**Psychology** James S. Nairne,2000 James Nairne s highly respected and accessible new edition offers all the content

pedagogy and visual appeal that professors and students have come to expect from a successful introductory psychology text and more Nairne's Second Edition offers a cohesive look at how psychology works in our everyday lives. This practical motivating text presents all the topics you cover in your introductory course but connects them in a way that adds meaning and consistency to your students' study of the discipline. And how does it do this? By introducing students to the adaptive mind, a theme based on the realization that our thoughts and actions stem from our need to adapt to our surroundings. This unique framework stresses practical applications and helps students understand how we use psychology to deal with everyday challenges. Nairne builds all topics around an adaptive problem-solving framework. He emphasizes the way that particular behaviors, thought processes, and emotions help people solve problems, from memorizing a telephone number to ducking under a cover as a building begins to shake to producing a quick physical response in the face of traffic hazards. This organizational framework also promotes a common theme of understanding across the chapters. This innovative approach may differ from the presentation you have come to expect from other texts. But beneath the innovation, you'll find ample coverage of all the traditional topics around which you build your course.

*Psych Concepts/Connections* Spencer A. Rathus, 2003-07 PSYCHOLOGY CONCEPTS AND CONNECTIONS BRIEF VERSION will help your students make the connections between key concepts in psychology and the connections between those concepts and their own lives. Spencer Rathus's warm and engaging writing style explains the fundamentals in ways that students can understand and then goes a step further to show how those fundamentals relate to students' daily lives. Rathus's commitment to helping students learn goes beyond the text narrative and is reflected in the text's proven active learning system PQ4R: Preview, Question, Read, Reflect, Review, and Recite. This system is seamlessly integrated into the book's companion Connections CD-ROM, the Book Companion Web Site, and the Study Guide, all of which are FREE with every new copy of the text. New Learning Connections and Life Connections sections in the text also include icons that cue students to interactive content on the Connections CD-ROM and the Book Companion Web Site. This seamless integration of text and technology enhances the active learning system PQ4R in the text and gives students multiple ways to connect with the text's current research and relevant applications. In this edition, Rathus invites students to learn about the latest in evolutionary psychology, biology, diversity, and gender issues in psychology in a text that is concise yet thorough.
