Most Indian and Tibetan religious traditions have some theory of yogic perception a profound type of sentience afforded by meditative practice And most consider it the bedrock of their religious authority the primary means by which one gains spiritual insight Disagreements about what yogis perceive abound however spanning many philosophical topics including epistemology ontology phenomenology and language *Out of Sight Into Mind* is a groundbreaking exploration of debates over yogic perception revealing their contemporary relevance as a catalyst for comparative philosophy Jed Forman examines intellectual and philosophical developments over a millennium in India and Tibet offering rich analyses of many previously untranslated texts He traces divergences and confluences between thinkers within and across traditions demonstrating that accounts of yogic perception shifted from theories based on vision to ones based on the mind Drawing on this investigation Forman calls for broadening philosophical discourse arguing that subjects like yogic perception have often been deemed religious and thus neglected He contends that these Indian and Tibetan debates hold important lessons for present day topics such as hermeneutics and exegesis the relationship between conception and perception representationalism versus phenomenalism and the limits of language Shedding new light on the intellectual history of yogic perception this book models

Dallery,Charles E. Scott,1989-07-01 The core source of this book is the work of Emmanuel Levinas Beginning with a chapter on speaking and the other three lead chapters focus on Levinas account of the face of the other These chapters are followed by explorations of the ethics of dissemination in Derrida the freedom of the other in Sartre the cultural other in Husserlian phenomenology the other as sexual difference in Irigaray and Nietzsche the sublime in aesthetics and the deconstruction of the primacy of the ego in Foucault and Lacan This book is especially relevant to feminist theory It shows that postmodern continental philosophy does indeed have ethical implications The question of the other or the presence of the other undercuts the foundationalist starting points of ethical theory and epistemology The Question of the Other presents fresh and original interpretations of Husserl Nietzsche Derrida Levinas Irigaray Foucault Lacan Heidegger and Sartre **Hegel and Contemporary Continental Philosophy** Dennis King Keenan,2004-06-10 Twenty three of the most important writings by contemporary continental thinkers on the work of Hegel

Between Levinas and Heidegger John E. Drabinski, Eric S. Nelson, 2014-08-25 Although both Levinas and Heidegger drew inspiration from Edmund Husserl's phenomenological method and helped pave the way toward the post-structuralist movement of the late twentieth century, very little scholarly attention has been paid to the relation of these two thinkers. There are plenty of simple and accurate oppositions and juxtapositions: French and German ethics and ontology and so on. But there is also a critical intersection between Levinas and Heidegger on some of the most fundamental philosophical questions: What does it mean to be, to think and to act in late modern life and culture? How do our conceptions of subjectivity, time and history both reflect the condition of this historical moment and open up possibilities for critique, resistance and transformation? The contributors to this volume take up these questions by engaging the ideas of Levinas and Heidegger relating to issues of power, violence, secularization, history, language, time, death, sacrifice, responsibility, memory and the boundary between the human and humanism. **Arts & Humanities Citation Index**, 1996
