Critique Of Soviet Economics:

A Critique of Soviet Economics Zedong Mao,1977 *A Critique of Soviet Economics* Zedong Mao,1982 [A Critique of Soviet Economics](#) Mao Tse-Tung,1977-01-01 [Critique of Soviet Economy](#) Mao Tse-Tung,2011-03-21 0 **Economics of Soviet Trade and Aid** Rabindranath Mukherji,1978 **Marxism and the Making of China** J. Gregor,2014-02-19 An assessment of the influence of the Marxism of Karl Marx and Friedrich Engels on revolutionary developments in China The work covers the period from the first appearance of the Chinese Communist Party under Mao Zedong until its full transformation by Deng Xiaoping into a nationalist developmental single party developmental dictatorship **Marxism, China, and Development** A. James Gregor,2017-07-05 China has always been something of a mystery to Westerners For one generation Mao Zedong and his followers were simple agrarian reformers while for another they were the communist emperor and his blue ants In the 1970s some of the finest Sinologists believed there was much the United States could learn from Mao's Great Proletarian Cultural Revolution with regard to bureaucracy criminal justice health care and mass education By the 1980s those same theorists asserted that Maoism was nothing more than a feudal fascism and had absolutely nothing positive to teach Marxism China and Development provides a plausible explanation of these developments that have had such a powerful effect on the people of China for the past half century The author describes and explains the strange collection of beliefs that made up the Marxism of Mao Zedong He seeks to understand why the communist leadership of China like that of the USSR tried to spur economic growth by abandoning the market modalities common to developed economies A James Gregor's conceptual framework is both original and makes more comprehensible the history of Marxism and the history of China Among the major topics he covers are imperialism political democracy economics and alternatives to Maoism and Marxism for China While it is unlikely that our understanding of so complex a series of events as modern Chinese history will soon become less controversial Marxism China and Development's clear concise explanations will clarify some perplexing areas and make the new turns in Chinese political economy more understandable This is a monumental effort at theory construction that will be of interest to political scientists economists sociologists and Sinologists *Socialism, Economics and Development (Routledge Revivals)* Alec Nove,2012-11-12 First published in 1986 this text brings together a selection of papers written by the great Alec Nove on development economics Marxist economies the Soviet economy and law and politics in the Soviet Union Reflecting the varied and diverse interests of its distinguished author the topics range from Soviet constitutional law to Trotsky's view of collectivization from a critique of conventional micro economics to the economic disaster of the Allende regime in Chile The author's long standing immersion in the past and present of the Soviet Union helps to provide the unique insights into the workings of Socialist economies characteristic of Professor Nove's previous work This volume should be essential reading for anyone interested in development economics socialist economies or the problems facing contemporary Soviet economic reformers **Maurice Dobb** T. Shenk,2013-12-17 This book explores the

life of the man whom even his critics acknowledged was one of the world's most significant Communist economists. From his outpost at the University of Cambridge where he was a protégé of John Maynard Keynes and mentor to students, Dobb made himself into one of British communism's premier intellectuals.

Research in Political Economy Paul Zarembka, 1987. This volume is specifically dedicated to developments in Marxist theory. It includes an article on Marxist class analysis and radical social theories which covers class structure and analysis, social feminism and Marxist analyses of the position of women. An article on economic structure and technological change covers the social organization of learning, science and economic forms of technological change, innovative costs, demand and evolution, new product developments and the universality of technological change in capitalism. Also included in the volume is a history of exploitation and racial inequality in the US economy covering non-exploitation approaches to racial inequality and domination and segregation, a study of Lenin and the socialist transition in Russia and Maurice Dobb's research on the Marxist and Smithian interpretation of the transition to capitalism.

The Marxian Concept of Capital and the Soviet Experience Paresh Chattopadhyay, 1994-10-30. This work establishes the uniqueness of the Marxian category of Capital on the basis of the original texts by Marx. The study has been neglected in the existing literature. The wage-labor relationship is shown to be necessary and sufficient for the existence of capitalism. Individual ownership is shown to be a particular form of capitalist private property which can also take the form of collective ownership. The author argues the capitalist character of the Soviet economy.

Journal of Economic Issues, 1978.

State Capitalism Barry Sheppard, 2006. Presents key materials refuting the anti-Marxist theory and the author looks at what happened in Russia since the demise of the old USSR showing that it cannot be explained as simply a transition from state capitalism to normal capitalism.

Austrian Theory and Economic Organization G. Nell, 2014-08-13. The Austrian economic school famously predicted and explained the problems of calculation in a socialist society. With their concept of spontaneous order, they challenged mainstream economists to look beyond simplified static models and consider the dynamic and evolutionary characteristics of social orders. However, many feel that Austrians took their victory too far and became ideologically devoted to laissez-faire.

Austrian Theory and Economic Organization is a collection of essays on problems and possibilities in economic organization written by economists and political scientists with an interest in the dynamic and evolutionary nature of market economies. Each chapter explores areas of potential agreement between Austrian theory, market socialist economics and other heterodox schools of economic and political science. The collection aims to bridge cultural and political divisions between free market advocates who stress individual rights and left-leaning thinkers who stress social justice and a culture of solidarity.
