Crobing The Dead Heart:

Crossing the Dead Heart, by C. T. Madigan Cecil Thomas Madigan, Madigan,1997 **Crossing the Dead Heart** Cecil Madigan,2023-08 *Australia's Muslim Cameleers* Philip Jones,Anna Kenny,2010 Between 1870 and 1920 as many as 2000 cameleers and 20 000 camels arrived in Australia from Afghanistan and northern India Australia s Muslim Cameleers is a rich pictorial history of these men their way of life and the vital role they played in pioneering transport and communication routes across outback Australia s vast expanses Many of the images and artefacts in this fascinating account are published here for the first time and this new edition contains additions to the biographical listing of more than 1200 cameleers Virtual Voyages Paul Longley Arthur,2011 Virtual Voyages is a fascinating account of the European discovery of the elusive great south land told through the literature of imaginary voyages Written at the height of the era of European maritime exploration these bizarre and captivating tales with their wildly imaginative visions of antipodean inversion and strangeness reveal a hidden history of attitudes to colonization By exposing the relationship between myth and reality in the antipodes this book casts new light on the power of fiction to influence history Crossing the Dead Heart C.T. Madigan,2023-09-01 This book is a classic narrative of modern exploration a story of adventure enterprise and patient scientific exploration illustrated by photographs taken on the expedition The Simpson is a sand ridge desert extending 200 miles 322 km west to east the ridges running parallel from north to south at roughly quarter mile 0.4 km intervals some reaching as high as 100 feet 30 m Madigan planned a ground crossing in the winter of 1939 A party of nine including a biologist a botanist a photographer and a radio operator with nineteen camels made the exhausting crossing from Andado station in the Northern Territory to Birdsville in twenty five days It verified Madigan s previous conclusions that the area was a wasteland This last classic Australian exploration adventure pioneered the use of mobile radio communication national broadcasts were made through the Australian Broadcasting Commission from desert camps The scientific results were published and also a popular account Crossing the Dead Heart Melbourne 1946 He saw the Dead Heart as a land of everlasting sand ridges and salt encrusted clay pans while his conclusions seemed correct then within twenty years the area was criss crossed by petroleum explorers Australian Dictionary of Biography The Littoral Zone CA. Cranston,Robert Zeller,2007 In this the first collection of ecocritical essays devoted to Australian contexts and their writers Australian and USA scholars settlers invaders temporary visa holders comment on the transliteration of sea land and interior through the works of major and minor authors and through their own experience with the bioregion The littoral zone is the starting point in this fresh approach to reading literature and is organised around the natural environment rainforest desert mountains coast islands Antarctica There s the beach where sexual and spiritual crises occur the Wheatbelt area the most visible clearance line on the planet desert literature camel trekking and the transformation of a salt flat into an inland island New Age literature that appropriates Aborigines and their cultures as the

Troelstra,2017-06-01 Anne Troelstra s fine bibliography is an outstanding and ground breaking work He has provided the academic world with a long needed bibliographical record of human endeavour in the field of the natural sciences The travel narratives listed here encompass all aspects of the natural world in every part of the globe but are especially concerned with its fauna flora and fossil remains Such eyewitness accounts have always fascinated their readers but they were never written solely for entertainment fragmentary though they often are these narratives of travel and exploration are of immense importance for our scientific understanding of life on earth providing us with a window on an ever changing and often vanishing natural world Without such records of the past we could not track document or understand the significance of changes that are so important for the study of zoogeography With this book Troelstra gives us a superb overview of natural history travel narratives The well over four thousand detailed entries ranging over four centuries and all major western European languages are drawn from a wide range of sources and include both printed books and periodical contributions While no subject bibliography by a single author can attain absolute completeness Troelstra s work is comprehensive to a truly remarkable degree The entries are arranged alphabetically by author and chronologically by the year of first publication under the author s name A brief biography with the scope and range of their work is given for each author every title is set in context the contents including illustrations are described and all known editions and translations are cited In addition there is a geographical index that cross refers between authors and the regions visited and a full list of the bibliographical and biographical sources used in compiling the bibliography Monthly Bulletin San
