History of Education This book celebrates its fiftieth volume In fourteen contributions written by different generations of historians of education it demonstrates that in an era where the history of education at university level is at risk both the journal and the discipline are pulsing and alive and kicking Was the journal a trendsetter or a follower and which position did it take with respect to the International Standing Conference for the History of Education These are questions addressed in the first section of this book In the second section a number of articles show national and transnational developments of the history of education In their diversity they make clear how the national and the transnational together characterize the discipline They show why journals in this domain should stimulate the development of broader concepts and theories in order to put national and regional cases in a broader scientific context and to make them attractive for international readership In the last section authors turn their minds to the future of the history of education They write about the shaping of new trends and about moving beyond borders focusing on among other things the challenge of neurosciences and of digital humanities This book was originally published as a special issue of *Paedagogica Historica* [Encyclopedia of Cross-Cultural School Psychology](#) Caroline S.
