Concentration of Maxima and Fundamental Limits in High-Dimensional Testing and Inference Zheng

Gao, Stilian Stoev, 2021-09-07 This book provides a unified exposition of some fundamental theoretical problems in high dimensional statistics It specifically considers the canonical problems of detection and support estimation for sparse signals observed with noise Novel phase transition results are obtained for the signal support estimation problem under a variety of statistical risks Based on a surprising connection to a concentration of maxima probabilistic phenomenon the authors obtain a complete characterization of the exact support recovery problem for thresholding estimators under dependent errors
