Temple of the Living God Philip N. Richardson, 2018-12-21 When writing to the Corinthians the Apostle Paul used figurative temple language repeatedly to shape the identity of his audience Temple of God Temple of the Holy Spirit and Temple of the Living God While other scholars have identified the place of the Jerusalem temple in Paul's thinking or the impact of temples in the life of Corinth there has been no comprehensive study of the way that figurative temple language in philosophy could have influenced the Corinthians worldview Hellenistic philosophy was pervasive in the first century and provided theological guidance for faith and practice to Paul's Gentile audience before their conversion Philip N Richardson provides a comprehensive survey of figurative temple language in Hellenistic philosophy shedding light on the way that the kinds of philosophical thought known in cities like Corinth may have influenced the Corinthians to think about figurative temple language This study throws into sharp relief the similarities and differences between Paul's use of temple language and that of philosophy and illuminates Paul's setting of this language in the wider framework of 1 2 Corinthians and his purpose for its use in the argument of the letters

[Brill's Companion to the Reception of Plato in Antiquity](#) Harold Tarrant, François Renaud, Dirk Baltzly, Danielle A. Layne, 2018-04-03 Brill's Companion to the Reception of Plato in Antiquity offers a comprehensive account of the ways in which ancient readers responded to Plato as philosopher as author and more generally as a central figure in the intellectual heritage of Classical Greece from his death in the fourth century BCE until the Platonist and Aristotelian commentators in the sixth century CE The volume is divided into three sections Early Developments in Reception four chapters Early Imperial Reception nine chapters and Early Christianity and Late Antique Platonism eighteen chapters Sectional introductions cover matters of importance that could not easily be covered in dedicated chapters The book demonstrates the great variety of approaches to and interpretations of Plato among even his most dedicated ancient readers offering some salutary lessons for his modern readers too

Adams,2012 The little extras *Archaeology of Logic* Andrew Schumann,2023-04-27 The question arises whether logic was given to us by God or whether it is the result of human evolution I believe that at least the modus ponens rule A and if A then B implies B is inherent in humans but probably many other modern systems e g resource logic non monotonic logic etc are the result of humans adapting to the environment It is therefore of interest to study and compare the way logic is used in ancient cultures as well as the way logic is going to be used in our 21st century This welcome book studies and compares the way formation of logic in three cultures Ancient Greek 4th century B C Judaic 1st century B C 1st century A D and Indo Buddhist 2nd century A D The book notes that logic became especially popular during the period of late antiquity in countries covered by the international trade of the Silk Road This study makes a valuable contribution to the history of logic and to the very understanding of the origins and nature of logical thinking Prof Dov Gabbay King s College London UK Andrew Schumann in his book demonstrates that logic step by step arose in different places and cultural circles He argues that if we apply a structural genealogical method as well as turn to various sources particularly religious philosophical linguistic etc then we can obtain a more general and more adequate picture of emergence and development of logic This book is a new and very valuable contribution to the history of logic as a manifestation of the human mind Prof Jan Wolenski Jagiellonian University Poland The author of the *Archaeology of Logic* defends the claim calling it logic is after all which sees logical competence as a practical skill that people began to learn in antiquity as soon as they realized that avoiding cognitive biases in their reasoning would make their daily activities more successful The in depth reading of the book with its diving into the comparative quotations in the long dead or hardly known to most of us languages like Sumerian Akkadian Aramaic Hebrew and etc will be rewarded by the response that the logical competence is diverse and it can be trained despite the inevitability of the reasoning fallacies and that critical discussions and agonial character of the social life are the necessary tools for that Prof Elena Lisanyuk Dio Chrysostom Chrysostom Dio,2011-10 *The New Statesman and Nation* ,1941 *What is a Gospel?* Charles H.
