Handbook of Global Philosophies on AI Ethics Naresh Singh, Ram B. Ramachandran, 2025-08-15. This book offers an exploration of the diverse perspectives shaping the future of artificial intelligence (AI), highlighting the influence of non-Western thinking in its development. What would the impact be if AI were developed with the wisdom of Ubuntu, the harmony of Confucian thought, or the Indian principle of Vasudhaiva Kutumbakam (the world is one family at its core)? This thought-provoking collection brings together leading voices from around the globe to reimagine AI systems that are fair, ethical, and inclusive. Addressing critical issues such as bias, fairness, privacy, and existential risks, it challenges the status quo and envisions a future where AI reflects the values of all humanity, not just a select few. Exploring the influence of topics like religion, culture, and social movements, the book examines how these perspectives shape AI's application in industries such as finance, education, and the military, while underscoring the importance of establishing robust ethical guardrails. Whether you're a curious reader, a policy maker, a scholar, or a tech innovator, this book is your guide to understanding how different cultural perspectives can redefine AI ethics. It's time to ask: what kind of world do we want AI to build for us all?

Autonomous Minds Francisco Javier Campos Zabala, 2025-10-07. A book that combines a technical explanation of agentic AI with the latest practical applications.
