Massey,Magaly Sánchez,Jere R. Behrman,2006-10-02 During the 1990s the United States encountered an unprecedented economic upsurge The duration and scope of this boom led many policymakers in D C to believe they had finally found a magic formula for sustained economic growth and seamless national development Labeled the Washington Consensus this free market approach was a shift away from regulation and government intervention toward allowing the markets work themselves out on a global level Was it magic After all this was an era where the markets for goods services capital and labor burst forth from North America Western Europe and Japan to stretch across the globe The Soviet Union had collapsed and East and Southeast Asian economies were flourishing Globalization and A New World Order became the slogans of the day In what some scholars and policymakers view as a massive social experiment the U S Treasury and the International Monetary Fund IMF began leaning on Latin American countries to dismantle their economic regime of import substitution industrialization ISI Without a firm understanding of the complexities involved international lenders pressed for implementation of the Washington Consensus advocating governments to step out of the way and let the markets do their work Yet every nation has a different history when it comes to the process of market creation The attempt to apply a blanket formula on countries with divergent political social and cultural legacies flopped miserably Supporters of the Washington Consensus discovered their
