After the Fall Tobias Buck, 2020-10-20 Tobias Buck arrived in Madrid in December 2012 in time to celebrate the bleakest Christmas the city had seen in a generation Capital and country were reeling from a series of economic shocks that had brought Spain to the brink of ruin The housing boom had dramatically turned to bust a large chunk of the nation's banking system was in state hands businesses were closing across the country debt was spiralling out of control and unemployment levels had reached a record high AFTER THE FALL presents a rich and vivid portrait of contemporary Spain at a critical moment in the country's history The book tells the story of Spain's long boom and sudden bust the brutal economic crisis that followed and the political and social aftershocks that reverberate to this day It explores the origins of the separatist movement in Catalonia and its bitter clash with the Spanish government that culminated in a failed secession referendum and a divisive declaration of independence It looks at the legacy of the Civil War and Franco dictatorship and the continuing struggle over historical memory in Spain today Based on five years of reporting and hundreds of interviews AFTER THE FALL takes the reader from the offices of power in Madrid and Barcelona to the villages of the Basque country still haunted by the memory of political violence and to the towns of Andalusia where an entire generation has seen its economic hopes shattered It describes how the country has been changed by the experience of migration and why after decades at the margins the far right eventually made a return to Spanish politics For all the problems and challenges facing Spain today we see that amid the ruins of the crisis the search for a new Spanish model is already underway **The Theory of Crisis and the Great Recession in Spain** Juan Pablo Mateo Tomé, 2019-11-08 This book has a dual purpose First it analyses the concept of economic crises within economic theory showing the various theoretical foundations and controversies amongst different schools of economic thought Second it presents an empirical analysis of the Great Recession

in Spain addressing the growth period of 1995 to 2007 08 the subsequent depression until 2013 14 and the recovery that followed It also shows the way in which the inner contradictions of capital manifests itself in an European peripheral economy under a real estate bubble emphasizing the role of the Spanish economy in European capitalism This theoretical and empirical heterodox approach will be of interest to students and scholars in political economy and those with an interest in the Eurozone

The Economic Consequences of the Health Crisis in Spain Jesús Rúa-Huerta Carbonell, 2020 In a context of uncertainty regarding the intensity and the duration of the coronavirus crisis the aim of this paper is to offer a picture of how the Spanish economy has coped in these crucial times The paper is structured by attempting to answer five main questions The first one refers to the impact of the health crisis on the real economy after a long and harsh lockdown that affected most of the Spanish population Besides a serious drop of GDP we look at the differential effects of the halt in the economic activity on the main sectors that characterize the country's economy A second section looks at how the halt in production has caused an intense growth of social problems The already high unemployment figures that existed before the crisis have increased as a lot of firms have been forced to stop their activity increasing inequality and poverty ratios in the country The third question looks at the financial perspective of the crisis stressing the need to maintain liquidity and resources which has become an essential strategic variable that must be supported by the governing institutions of the monetary system especially the European Central Bank In this context government intervention and the maintenance of the Welfare State became key actors in achieving a quick and effective response to the economic and social crisis thus why the fourth section is dedicated to the main regulatory and fiscal policies applied by the Government and state institutions Finally we dedicate the last section to presenting some considerations related to the macroeconomic effects of the COVID 19 crisis in the European context and the main policies proposed by the European institutions
