Crisis in the Classroom Charles E. Silberman, 1970 **Encyclopedia of Curriculum Studies** Craig Kridel, 2010-02-16 The *Encyclopedia of Curriculum Studies* provides a comprehensive introduction to the academic field of curriculum studies for the scholar student teacher and administrator The study of

curriculum beginning in the early 20th century served primarily the areas of school administration and teaching and was seen as a method to design and develop programs of study. The field subsequently expanded to draw upon disciplines from the arts, humanities, and social sciences and to examine larger educational forces and their effects upon the individual, society, and conceptions of knowledge. Curriculum studies has now emerged to embrace an expansive and contested conception of academic scholarship while focusing upon a diverse and complex dynamic among educational experiences, practices, settings, actions, and theories in relation to personal and institutional needs and interests. The *Encyclopedia of Curriculum Studies* serves to inform and to introduce terms, events, documents, biographies, and concepts to assist the reader in understanding aspects of this rapidly changing field of study. Representative topics include: Origins, definitions, dimensions, and variations on Curriculum Studies; Curriculum development and design for schools; Curricular purpose, implementation, and evaluation; Contemporary issues, e.g., standards, tests, and accountability; Curricular dimensions of teaching and teacher education; Interdisciplinary perspectives on institutionalized curriculum; Informal curricula of homes, mass media, workplaces, organizations, and relationships; Impact of race, class, gender, health, belief, appearance, place, ethnicity, language; Relationships of curriculum and poverty, wealth, and related factors; Modes of curriculum inquiry and research; Curriculum as cultural studies, exploring the formation of identities and possibilities; Corporate, state, church, and military influence as curriculum; Global and international perspectives on curriculum; Curriculum organizations, journals, and resources; Summaries of books and articles on curriculum studies; Biographic vignettes of key persons in curriculum studies; Relevant photographs.

Operational PPBS for Education, Robert F. Alioto, J. A. Jungherr, 1971. *Curriculum Windows*, Thomas S. Poetter, 2015-01-01. Curriculum Windows: What Curriculum Theorists of the 1970s Can Teach Us about Schools and Society. Today is an effort by students of curriculum studies along with their professor to interpret and understand curriculum texts and theorists of the 1970s in contemporary terms. The authors explore how key books/authors from the curriculum field of the 1970s illuminate new possibilities forward for us as scholar educators today. How might the theories, practices, and ideas wrapped up in curriculum texts of the 1970s still resonate with us, allow us to see backward in time and forward in time all at the same time? How might these figurative windows of insight, thought, ideas, fantasy, and fancy make us think differently about curriculum, teaching, learning, students, education, leadership, and schools? Further, how might they help us see more clearly, even perhaps put us on a path to correct the mistakes and missteps of intervening decades and of today? The chapter authors and editor revisit and interpret several of the most important works of the 1970s by Norman Overly, Michael Apple, Eliot Eisner, John Goodlad, Louise Berman, William Reid, Bill Pinar, Daniel Tanner, Laurel Tanner, Maxine Greene, James MacDonald, and Joseph Schwab. The book's Foreword is by renowned curriculum theorist William H. Schubert. The Foundations of
