The Framework of the Crisis of the Aristocracy 1558-1641 Christopher Thompson,1986 **Contested Spaces of Nobility in Early Modern Europe** Charles Lipp, 2016-05-13 In recent years scholars have increasingly challenged and reassessed the once established concept of the crisis of the nobility in early modern Europe Offering a range of case studies from countries across Europe this collection further expands our understanding of just how the nobility adapted to the rapidly changing social political religious and cultural circumstances around them By allowing readers to compare and contrast a variety of case studies across a range of national and disciplinary boundaries a fuller if more complex picture emerges of the strategies and actions employed by nobles to retain their influence and wealth The nobility exploited Renaissance science and education disruptions caused by war and religious strife changing political ideas and concepts the growth of a market economy and the evolution of centralized states in order to maintain their lineage reputation and position Through an examination of the differing strategies utilized to protect their status this collection reveals much about the fundamental role of the second order in European history and how they had to redefine the social and cultural spaces in which they found themselves By using a transnational and comparative approach to the study of the European nobility the volume offers exciting new perspectives on this important if often misunderstood social group The Orders of Kniahthood and the Formation of the British Honours System, 1660-1760 Antti Matikkala, 2008 Sheds considerable new light on the nature development and functions of the orders in a key phase of their history and goes a long way to explaining how such archaic institutions could flourish in a culture that is commonly thought anti traditional and especially hostile to the middle ages Professor JONATHAN BOULTON University of Notre Dame This is the first comprehensive study to set the British orders of knighthood properly into the context of the honours system by analysing their political social and cultural functions from the Restoration of the monarchy to the end of George II s reign It examines the revival of the Order of the Garter and the proposals to establish the Orders of the Royal Oak and the Esquires of the Martyred King at the Restoration the foundation 1687 and the revival 1703 4 of the Order of the Thistle as well as the foundation of the Order of the Bath 1725 It establishes just how central a part the orders played in the British high political life and its comprehensive and multidimensional approach carefully contrasts the idealistic discourse of virtue and honour to the real workings of the honours system it also makes the case for the Chivalric Enlightenment The orders over the water the Garter and the Thistle

conferred by the Jacobite claimants are discussed for the first time in the context of the established British honours system Overall the comparison between the socially very restricted British and the increasingly meritocratic Continental orders highlights the isolation of the British honours system from the European tendencies War and Society in Habsburg Spain I.A.A. Thompson, 2024-10-28 The historical study of war in the Spain of Philip II forms the starting point for the articles in this volume They approach this not so much from a military angle but as a problem of organization procurement and finance In a sense the articles represent an assessment of the effectiveness of the Spanish government and so given the apparent precocity of government growth in 16th century Spain they can also be seen as a critical commentary on the operational capabilities of the early modern absolutist state Six of the essays here focus on the Spanish Armada in terms of its political and military objectives but demonstrating how these were conditioned by basic systems limitations not least in the procurement of suitable cannon In the final articles Dr Thompson turns to the impact of war and its financing on the social structure bearing in particular on the definition of nobility and its sale and on local democracy and making full use here as elsewhere of the relatively unexplored local sources Two of the papers here appear for the first time in English whilst a third has been newly prepared for this volume L tude historique de la guerre sous Philippe II roi d Espagne est la base des articles contenus dans le pr sent recueil Ceci est abord non tant sous l'angle militaire mais comme un probleme d'organisation d acquisition de mat riel et de financement En un certain sens ces documents repr sentent une valuation de l efficacit du gouvernement espagnol et peuvent par cons quent tant donn e l'apparente pr cocit de la croissance gouvernementale en Espagne au 16 si cle tre consid r s comme un commentaire critique quant aux capacit s op rationnelles de l Etat absolu proto moderne Une demi douzaine des essais font l'examen de l'Armada espagnole en terme d'objectifs politiques et militaires tout en d montrant comment ces derniers taient conditionn s par des contraintes structurales **Rural Society and Economic Change in County Durham** A. T. Brown, 2015 In the middle of the fifteenth century the economy of north east England was beset by crises population was low production was stagnant and many landowners faced penury By the end of the sixteenth century however the precocious development of the coal industry and high levels of inflation provided opportunities for investment and profit in the Durham countryside This book examines the development of agrarian capitalism estate management tenure and the land market social mobility the gentrification of merchant wealth and the emergence of the yeomanry during this period in the region It looks at such questions as how the coal industry was affected by the fifteenth century recession and the effects its rapid expansion had upon landed society reassesses debates on the rise of the gentry and the crisis of the aristocracy and considers how the wholesale economic changes of this period affected the social structure of late medieval and early modern England Although this period is often seen as a transitional era this book argues that it needs to be studied as one long agrarian cycle showing the degree to which patterns of landholding fixed during the fifteenth century recession affected the distribution of profits between different types of lords and tenants in the sixteenth

and early seventeenth century A T Brown is an Addison Wheeler Fellow at Durham University **Ineffable Bodies Christine** Sukic, 2025-05-30 Ineffable Bodies focuses on early modern heroism in drama through the notion of ineffability in order to define new dramatic forms Drawing from Vladimir Jank l vitch s studies on the ineffable the book focuses on heroic bodies on the early modern stage as the seat of an aesthetic shift in drama the early modern heroic body testifies to an inability to tell heroic stories Examples are taken from plays by Shakespeare Chapman and Daniel in which martial heroes are placed in a position where they cannot give full sway to their heroic status or are simply revealed as failed heroes The playwrights experiment with action and favour forms that have lost their meaning or contents stressing the mutation from the factual or the material to the immaterial and the ineffable The English Civil War John Adamson, 2008-12-16 John Adamson provides a new synthesis of current research on the political crisis that engulfed England in the 1640s Drawing on new archival findings and challenging current orthodoxies these essays by leading historians offer a variety of original perspectives locating English events firmly within a three kingdoms context The Third Pillar Raghuram Rajan, 2020-02-25 Revised and updated Shortlisted for the Financial Times McKinsey Business Book of the Year Award From one of the most important economic thinkers of our time a brilliant and far seeing analysis of the current populist backlash against globalization Raghuram Rajan distinguished University of Chicago professor former IMF chief economist head of India's central bank and author of the 2010 FT Goldman Sachs Book of the Year Fault Lines has an unparalleled vantage point onto the social and economic consequences of globalization and their ultimate effect on our politics In The Third Pillar he offers up a magnificent big picture framework for understanding how these three forces the state markets and our communities interact why things begin to break down and how we can find our way back to a more secure and stable plane The third pillar of the title is the community we live in Economists all too often understand their field as the relationship between markets and the state and they leave squishy social issues for other people That's not just myopic Rajan argues it's dangerous All economics is actually socioeconomics all markets are embedded in a web of human relations values and norms As he shows throughout history technological phase shifts have ripped the market out of those old webs and led to violent backlashes and to what we now call populism Eventually a new equilibrium is reached but it can be ugly and messy especially if done wrong Right now we re doing it wrong As markets scale up the state scales up with it concentrating economic and political power in flourishing central hubs and leaving the periphery to decompose figuratively and even literally Instead Rajan offers a way to rethink the relationship between the market and civil society and argues for a return to strengthening and empowering local communities as an antidote to growing despair and unrest Rajan is not a doctrinaire conservative so his ultimate argument that decision making has to be devolved to the grass roots or our democracy will continue to wither is sure to be provocative But even setting aside its solutions The Third Pillar is a masterpiece of explication a book that will be a classic of its kind for its offering of a wise authoritative and humane explanation of the forces that have wrought such a sea

change in our lives **The Building of Elizabethan and Jacobean England** Maurice Howard,2007 Transformation an introduction Bare ruin d choirs re visited All this new building the urban landscape A language for architecture The role of patrons Representing buildings Thomas Hobbes and Political Theory Mary G.
