Critical Exposition Of The Phil Leibniz:

A Critical Exposition of the Philosophy of Leibniz Bertrand Russell, 1958 **Gottfried Wilhelm Leibniz: Metaphysics and its foundations I** R. S. Woolhouse, 1994 Leibniz's New Essays Concerning the Human Understanding John Dewey, 1888 New Essays on Human Understanding is a chapter by chapter rebuttal by Gottfried Leibniz of John Locke s major work An Essay Concerning Human Understanding It was finished in 1704 but Locke's death was the cause alleged by Leibniz to withhold its publication The book appeared some sixty years later Like many philosophical works of the time it is written in dialogue form The two speakers in the book are Theophilus who represents the views of Leibniz and Philalethes who represents those of Locke The famous rebuttal to the empiricist thesis about the provenance of ideas appears at the beginning of Book II Nothing is in the mind without being first in the senses except for the mind itself All of Locke's major arguments against innate ideas are criticized at length by Leibniz who defends an extreme view of innate cognition according to which all thoughts and actions of the soul are innate In addition to his discussion of innate ideas Leibniz offers penetrating critiques of Locke s views on personal identity free will mind body dualism language necessary truth and Locke s attempted proof of the existence of God The Congregationalist ,1892 Leibniz's Metaphysics Christia Mercer, 2001-11-19 This book offers a major reassessment of Leibniz s metaphysics Christia Mercer has exposed the underlying doctrines of Leibniz s philosophy By analysing Leibniz s early works she demonstrates that the metaphysics of pre established harmony developed many years earlier than previously believed and for reasons which have not been understood As a result of this analysis she has unearthed a philosophical school that Leibniz scholars have not recognized A much deeper understanding of some of Leibniz s key doctrines emerges Moreover since the Leibniz that is revealed here does not fit neatly into the standard accounts of the history of philosophy and science Christia Mercer's study will prompt scholars to reconsider their basic assumptions about early modern philosophy and science **The Philosophical Review** Jacob Gould Schurman, James Edwin Creighton, Frank Thilly, Gustavus Watts Cunningham, 1899 An international journal of general philosophy Science of the Individual: Leibniz's Ontology of Individual Substance Stefano Bella, 2005-05-10 In his well known Discourse on Metaphysics Leibniz puts individual substance at the basis of metaphysical building In so doing he connects himself to a venerable tradition His theory of individual concept however breaks with another idea of the same tradition that no account of the individual as such can be given Contrary to what has been commonly accepted Leibniz s intuitions are not the mere result of the transcription of subject predicate logic nor of the uncritical persistence of some old metaphysical assumptions They grow instead from an unprejudiced inquiry about our basic ontological framework where logic of truth linguistic analysis and phenomenological experience of the mind s life are tightly interwoven Leibniz s struggle for a concept capable of grasping concrete individuals as such is pursued in an age of great paradigm changes from the Scholastic background to Hobbes's nominalism to the Cartesian way of ideas or Spinoza's substance metaphysics when the relationships among words ideas and things are intensively discussed and wholly reshaped This is the context where the genesis and significance of Leibniz s theory of complete being and its concept are reconstrued The result is a fresh look at some of the most perplexing issues in Leibniz scholarship like his ideas about individual identity and the thesis that all its properties are essential to an individual The questions Leibniz faces and to which his theory of individual substance aims to answer are yet to a large extent those of contemporary metaphysics how to trace a categorial framework How to distinguish concrete and abstract items What is the metaphysical basis of linguistic predication How is trans temporal sameness assured How to make sense of essential attributions In this ontological framework Leibniz s further questions about the destiny of human individuals and their history are spelt out Maybe his answers also have something to tell us This book is aimed at all who are interested in Leibniz s philosophy history of early modern philosophy and metaphysical issues in their historical development
