China's Economic New Normal Fang

Cai,2020-03-11 This timely volume on China's economic New Normal features articles by leading scholars from the Chinese Academy of Social Sciences and other research institutions across the country. A broad range of perennial as well as hot bottom topics related not just to economic growth but also to its social and political ramifications are covered including patterns of growth, income distribution, domestic consumption, the global economic dynamics and policy responses to these and other developments. Contributors not only combine theoretical and empirical analyses of these critical issues but also examine the historical background and the social context to what may be one of the most significant developments not just for China but also for the rest of the world. Rapid Growth of Selected Asian Economies. Lessons and Implications for Agriculture and Food Security Food and Agriculture Organization: Regional Office for Asia and the Pacific, Food and Agriculture Organization of the United Nations, 2006-01-01 Part I China's rapid economic growth and its implications for agriculture and food security in China and the rest of the world Part II Indian agriculture and scenario for 2020 *China's Economy Into the New Century* John Wong, Ding Lu, 2002 In the last two decades of the 20th century China stood out as the world's star performer in economic growth thanks to the market oriented reform that started in 1978. At the turn of the century the Chinese economy faces a series of challenges to sustain its growth and stability. The two decade long rapid growth has effectively strengthened China's economic power and raised its people's standard of living. It has also transformed China from a centrally planned command economy into a socialist market economy which operates increasingly in line with capitalist norms. Major structural problems however remain and are growing acute. Weakness in the fiscal system breeds rent seeking at the local level and causes tension in the state budget. The flawed financial institutions and the biased ownership structure continue to distort resource allocation and cause huge efficiency losses. Inter provincial and inter regional disparity is reaching a level that threatens national unity and social stability. As China joins the World Trade Organization and becomes more integrated into the world economy it urgently needs to improve the domestic business environment and to beef up indigenous industries for foreign competition. This volume is a collection of papers written by scholars at the East Asian Institute to address those problems during the period 1999-2001. The authors with their knowledge and experience in China studies provide in depth observations and professional analyses of some of the most important issues for the Chinese economy at the turn of the century. Some of the observations and analyses lead to enlightening policy recommendations. The solid scholarship combined with the policy orientation of these papers will appeal greatly to researchers in academia, governments and other institutions. The policy oriented and fact based analyses will also be of interest to practitioners in business including business consultants. **The Chinese Economy**, 2008 **China's Surging Economy** John Wong, Wei Liu, 2007 The Chinese economy today is at a critical crossroads. Sustained rapid growth has given rise to structural strains as well as sectoral imbalances. It has also generated socio economic problems such as rising income inequality, rural discontent and environmental degradation. All of these must be addressed before China can enter the next lap.

of high growth Containing 12 chapters this volume is a collaborative effort of leading economists from Beijing Singapore and elsewhere in the region in analyzing China s economic growth prospects and their concomitant problems and constraints

development strategy amid various old and new challenges that face the economy this book sets the scene for what the world can expect in China's fifth decade of reform and development. A key feature of this book is its comprehensive coverage of the key issues involved in China's economic reform and development. Included are discussions of China's 40 years of reform and development in a global perspective, the political economy of economic transformation, the progress of marketisation and changes in market-compatible institutions, the reform program for state-owned enterprises, the financial sector and fiscal system reform, and its foreign exchange system reform, the progress and challenges in economic rebalancing and the continuing process of China's global integration. This book further documents and analyses the development experiences including China's large-scale migration and urbanisation, the demographic structural changes, the private sector development, income distribution, land reform, and regional development, agricultural development, and energy and climate change policies.
