stream Through the prism of gender and public relations it examines not only the manipulatory but also the emancipatory subversive and transformatory potential of public relations for the construction of meaning Its focus is on the dynamic interrelationships arising from public relations activities in society and the gendered lived experiences of people working in the occupation of public relations There are many previously unexplored areas within and through public relations which the book examines These include the production of social meaning and power relations advocacy and activist campaigns for social and political change the negotiation of identity diversity and cultural practice celebrity bodies fashion and harassment in the workplace notions of managing reputation and communicating policy In extending the field of inquiry this edited collection highlights how gender is accomplished and transformed and thus how power is exercised and inequality re produced or challenged in public relations The book will expand thinking about power relations and privilege for both women and men and how these are affected by the interplay of social cultural and institutional practices Winner of the Outstanding Book PRide Award awarded by the National Communication Association NCA

Perspective in the Field of Communication Aileen Estrada Fernandez, 1992 **The Media and International**

Communication Barbara Lewandowska-Tomaszczyk, Tomasz Płudowski, Dolores V. Tanno, 2007. The twenty-first century is witness to complex social, political and cultural phenomena transforming the world in which we live. There are numerous aspects to this global process; most of them, however, are related one way or another to the media of communication which foster and accelerate it. The chapters in this book approach media and international intercultural communication from various global perspectives. The authors provide insight into the impact of media on different contexts, cultures and nations. One theme that weaves its way throughout this collection of essays is an intercultural one broadly defined as the contact point between two cultures that changes both to some degree. Scholars from different places in the world try to understand, explain and/or argue from a variety of traditions, perspectives and values. They examine the contact point between culture and identity, media and culture, art and media, technology and translation, theater and culture etc. in order to better understand how and to what degree changes occur. **Subject Guide to Books in Print**, 1997 Multicultural Public Relations

Stephen P. Banks, 1995-02-28. Increasing emphasis is now placed upon the need for cultural awareness in business communication. This innovative book re-examines the nature of culture, diversity, public relations and communicative effectiveness. It establishes a broad-based and culture-sensitive theory of communication for public relations. It goes on to analyze the influence of different cultural perspectives on public relations practice in internal communication, community relations, communicating with activist audiences and international programmes. Going beyond traditional views of culture and multiculturalism to develop a core concept of stigmatized differences, this book provides clear practical guidelines for understanding and communicating in multicultural settings. *Public Relations in Global Cultural Contexts* Nilanjana Bardhan, C. Kay Weaver, 2011-01-31. This volume emphasizes theories and concepts that highlight global interconnectedness through a range of interpretative and critical approaches to understanding the global significance and impacts of public relations.
