Tokuhamas-Espinosa,2014-04-28 A practical classroom oriented guide to best practice teaching Learning specialist Leslie

Hart once wrote that designing educational experiences without knowledge of the brain is like designing a glove without knowledge of the hand. *Making Classrooms Better* takes this concept a step further building from general knowledge of brain based education science and current educational research to offer specific suggestions for how teachers can improve student learning outcomes. Covering a range of subjects from creating an optimal classroom climate to maximizing metacognitive skill development this well researched state of the art guide is an essential resource for highly effective practices that teachers administrators and curriculum planners can easily use. The first half of the book provides a practical overview of teaching from a Mind Brain and Education perspective through an understanding of the intersection of the fields of neuroscience psychology and pedagogy. The second half shares 50 evidence based classroom best practices that have a proven positive impact on student learning outcomes and explains why they work.

Toward a Feminist Account of Strong Sense

Critical Thinking Corrinne Marie Bedecarré, 1994 *Reasonable Children* Michael S. Pritchard, 1996 The public outcry for a return to moral education in our schools has raised more dust than it has dispelled. Building upon his provocative ideas in *On Becoming Responsible* Michael Pritchard clears the air with a sensible plan for promoting our children's moral education through the teaching of reasonableness. Pritchard contends that children have a definite but frequently untapped capacity for reasonableness and that schools in a democratic society must make the nurturing of that capacity one of their primary aims as fundamental to learning as the development of reading writing and math skills. Reasonableness itself he shows can be best cultivated through the practice of philosophical inquiry within a classroom community. In such an environment children learn to work together to listen to one another to build on one another's ideas to probe assumptions and different perspectives and ultimately to think for themselves. Advocating approaches to moral education that avoid mindless indoctrination and timid relativism Pritchard neither preaches nor hides behind abstractions. He makes liberal use of actual classroom dialogues to illustrate children's remarkable capacity to engage in reasonable conversation about moral concepts involving fairness cheating loyalty truth telling lying making and keeping promises obedience character and responsibility. He also links such discussions to fundamental concerns over law and moral authority the roles of teachers and parents and the relationship between church and state. Pritchard draws broadly and deeply from the fields of philosophy and psychology as well as from his own extensive personal experience working with children and teachers. The result is a rich and insightful work that provides real hope for the future of our children and their moral education.
