Secret Weapons and World War II Walter E. Grunden, 2005 Grunden's analysis of this fundamental flaw in the Japanese war effort seamlessly weaves together science technology and military history to provide an entirely unique look at a crucial but understudied aspect of World War II Comparing the science and weapons programs of all the major combatants he demonstrates that Japan's failure was nearly inevitable given its paucity of strategic resources

an inadequate industrial base the absence of effective centralized management to coordinate research military hostility toward civilian scientists and bitter interservice rivalries In the end Japan could not overcome these obstacles and thus failed to make the transition to the kind of Big Science it needed to ward off its enemies and dominate the Far East BOOK JACKET

from the 19th century until today focusing mainly on the post World War II period and systematically surveys the kind of research programs within organization theory and strategy that have used historical data and or history as a theoretical construct while also identifying the remaining blind spots As a whole it offers a kind of roadmap for management scholars and historians to situate their research and hopefully find new roads for others to travel The book is intended for anybody conducting or planning to conduct historical research within management and organization studies and aims in particular at becoming a standard feature of research methods courses in business schools and departments of management
