Demystifying Brahminism and Re-Inventing Hinduism Satya Shri, 2017-01-23 Religion is a tool in the hands of the oppressor against the oppressed solely because he frames the commandments and calls them the God s is an apt description of the Hindu social order The book rips open the raw nerve of Hinduism its invidious castes positioned as a God ordained institution commandeered by its freebooter priestly class while clandestinely establishing its religious social and political hegemony through interpolation of its pristine and effulgent scriptures The author boldly analyses this imbroglio through a microscopic analysis of these and more related issues How priests controlled the Hindu religious social educational and political apparatus How the dominant priestly class fractured the society into mutually antagonistic subordinated hierarchical segments and ruled it by reserving all elite jobs for itself How the fiendish priesthood emasculated shudras by depriving them of the shastra and shastra education and arms and made them permanent village servant classes How the pretensions of attaining siddhis through meditation and penances established priests as the gods on earth for their assertions of purity and effulgence How karma reincarnation and 84 lakhs births theories were devised to justify fatalism and hierarchical gradation of varnas Can India be rightfully called the vishvaguru and the mother of all civilisations How Buddhism effeminated Hindus and made them the doormats for the ruthless Why Hindus had to abandon their own to adopt foreign institutions of governance Why Hinduism should become a universal and proselytising faith and fight demographic challenges posed by Islam and Christianity

Comparative Religions and Philosophies Ravi Prakash

'Babloo',2021-09-10 COMPARATIVE RELIGIONS AND PHILOSOPHIES Comparative religion is the branch of the study of religions concerned with the systematic comparison of the doctrines and practices of the world's religions. In general, the comparative study of religion yields a deeper understanding of the fundamental philosophical concerns of religion such as ethics, metaphysics, and the nature and form of salvation. Studying such material is meant to give one a richer and more sophisticated understanding of human beliefs and practices regarding the sacred, numinous, spiritual, and divine. In the field of comparative religion, the main world religions are generally classified as Abrahamic, Indian, or Taoic. In the study of comparative religion, the category of Abrahamic religions consists of the three monotheistic religions: Christianity, Islam, and Judaism, which claim Abraham as a part of their sacred history. Comparative mythology is the comparison of myths from different cultures in an attempt to identify shared themes and characteristics. Comparative mythology has served a variety of academic purposes. For example, scholars have used the relationships between different myths to trace the development of religions and cultures, to propose common origins for myths from different cultures, and to support various psychological theories. The book is intended to assist students and teachers who are interested in this subject.
