## **Critique Of The Study Of Kinship:**

*A Critique of the Study of Kinship* David Murray Schneider, 1984 Schneider views kinship study as a product of Western bias and challenges its use as the universal measure of the study of social structure **The Cultural Analysis of Kinship**

Richard Feinberg, Martin Ottenheimer, 2001 In the mid 1970s David M Schneider rocked the anthropological world with his announcement that kinship did not exist in any culture known to humankind This volume provides a critical assessment of Schneider's ideas focusing particularly on his contributions to kinship studies and the implications of his work for cultural relativism Schneider's deconstruction of kinship as a cultural system sounded the death knell for a certain kind of kinship study At the same time it laid the groundwork for the re emergence of kinship studies as a centerpiece of anthropological theory and practice Now a mainstay of cultural studies Schneider's conception of cultural relativism revolutionized thinking about kinship family gender and culture For feminist anthropologists his ideas freed kinship from the limitations of biology providing a context for establishing gender as a cultural construct Today his work bears on high profile issues such as gay and lesbian partners and parents surrogate motherhood and new reproductive technologies Contributors to *The Cultural Analysis of Kinship* appraise Schneider's contributions and his place in anthropological history particularly in the development of anthropological theory Situating Schneider's work and influence in relation to major controversies in the history of anthropology and of kinship studies they examine his important insights and their limitations consider where his approach might lead and offer alternative paradigms Inspiring many with his keenly critical mind and willingness to flout convention discomfiting others with his mercurial temperament David Schneider left an ineradicable mark on his field These frank observations on the man and his ideas offer a revealing glimpse of one of modern anthropology's most complex and paradoxical figures *The Social Science Encyclopedia* Adam Kuper, Jessica Kuper, 2004-10-14 The Social Science Encyclopedia first published in 1985 to acclaim from social scientists librarians and students was thoroughly revised in 1996 when reviewers began to describe it as a classic This third edition has been radically recast Over half the entries are new or have been entirely rewritten and most of the balance have been substantially revised Written by an international team of contributors the Encyclopedia offers a global perspective on key issues within the social sciences Some 500 entries cover a variety of enduring and newly vital areas of study and research methods Experts review theoretical debates from neo evolutionism and rational choice theory to poststructuralism and address the great questions that cut across the social sciences What is the influence of genes on behaviour What is the nature of consciousness and cognition What are the causes of poverty and wealth What are the roots of conflict wars revolutions and genocidal violence This authoritative reference work is aimed at anyone with a serious interest in contemporary academic thinking about the individual in society

**Beyond Expectation** Jacquelyne Luce, 2010-01-01 An in depth study of lesbian bi and queer women's experiences of thinking about and trying to become a parent *Beyond Expectation* draws on eighty two narrative interviews conducted during

the late 1990s in British Columbia Jacquelyne Luce chronicles these women's experiences which took place from 1980 to 2000 during a period that saw significant changes to the governance of assisted reproduction and the status of lesbian gay bisexual and transgender parents and same sex partners *Beyond Expectation* looks closely at the changing contexts in which women's experiences occurred and draws attention to complex issues such as contracting relationships mediating understandings of biology and genetics and decision making amidst various social legal and medical developments Luce skillfully juxtaposes the stories of her interviewees with the wider public discourses about lesbian bi queer parenting and reproductive technology and highlights gaps in existing legislative reforms Most importantly *Beyond Expectation* foregrounds the lived experiences of lesbian bi and queer women as they negotiate kinship at the intersection of reproduction technology and politics

*Webs of Power* Evelyn Blackwood, 2000-01-12 *Webs of Power* offers a fresh perspective on women in Southeast Asia Focusing on one rural Minangkabau village the book provides vital insights into the gendered processes of post coloniality The Minangkabau living in West Sumatra are the largest matrilineal group in the world They have intrigued generations of scholars because they are matrilineal and Islamic By exploring the contestations and accommodations women and men make with state and Islamic ideologies *Webs of Power* discloses the processes at the heart of globalization as well as the complexities of kinship and power in a rural agricultural community The book challenges conventional thinking about matriliney showing the prominence of senior women in all aspects of village life

**Three Styles in the Study of Kinship** J. A. Barnes, 2004 The study of kinship is a fundamental part of the study and the practice of social anthropology This volume examines the work of three distinguished anthropologists that bear on kinship and determines what theoretical models are implicit in their writings and assesses to what extent their claims have been validated The anthropologists studied are from France the UK and USA Claude Levi Strauss Meyer Fortes and G P Murdock First published in 1971

Critical Kinship Studies Damien W. Riggs, Elizabeth Peel, 2016-09-15 This book draws together research on posthumanism and studies of kinship to elaborate an account of western human kinship practices Studies of kinship have increasingly sought to critique the normative assumptions that often underpin how caring relationships between humans are understood The categorisation of human and kinship is brought into question and this book examines who might be excluded through adherence to accepted categories and how a critical lens may broaden our understanding of caring relationships Bringing together a diverse array of analytic foci and theoretical lenses *Critical Kinship Studies* opens up new avenues for understanding what it means to be in relationships with others and in so doing challenges the human exceptionalism that has often limited how we think about family loss love and subjectivity
