## **Critique For Ecology:**

*A Critique for Ecology* Robert Henry Peters,1991-07-26 This is a book of criticism It is directed at contemporary ecology but would apply to any science or indeed any statement that claims to contain information Application of simple criteria to judge the information in ecological statements reveals deep inadequacies in the science Furthermore the complexity of the contemporary field of ecology and the mistraing of a generation of ecologists has obscured its weakness As a result many ecologists are unaware of the failings of the science although others are deeply concerned for the future of the field The author Professor Peters argues that a return to simple question of fact to observations and to questions of general relevance to science and society can make ecology a useful practical and informative science Such science is desperately needed to meet the problems of the age A thought provoking book that will be of interest to all scientists but in particular ecologists from undergraduates to senior academics and professionals

**Ecological Literature and the Critique of Anthropocentrism** Bryan L. Moore,2017-10-14 This book is an analysis of literary texts that question critique or subvert anthropocentrism the notion that the universe and everything in it exists for humans Bryan Moore examines ancient Greek and Roman texts medieval to twentieth century European texts eighteenth century French philosophy early to contemporary American texts and poetry and science fiction to demonstrate a historical basis for the questioning of anthropocentrism and contemplation of responsible environmental stewardship in the twenty first century and beyond Ecological Literature and the Critique of Anthropocentrism is essential reading for ecocritics and ecofeminists It will also be useful for researchers interested in the relationship between science and literature environmental philosophy and literature in general

**Approaching Deep Ecology** Warwick Fox,1986-01-01 **Struggle for Nature** Jozef Keulartz,1998 The Struggle for Nature presents a well researched and erudite survey of the historical development and current state of environmental thinking Bookchin Damian F. White,2008-10-20 This is the first comprehensive overview of the work of Murray Bookchin the left libertarian social theorist and political ecologist who is widely regarded as the visionary precursor of anti corporate politics Bookchin s writing spans fifty years and engages with a wide variety of issues from ecology to urban planning from environmental ethics to debates about radical democracy Weaving insights from Hegel and Marx Kropotkin and Mumford Bookchin presents a critical theory whose central utopian message is things could be other than they are This accessible introduction maps the evolution of Bookchin s project It traces his controversial engagements with Marxism anarchism critical theory postmodernism and eco centric thought It evaluates his attempt to develop a social ecology Finally it considers how his thinking relates to current debates in social theory and environmentalism critical theory and philosophy political ecology and urban theory Offering a clear account of Bookchin s key themes this book provides a critical but sympathetic account of the strengths and weaknesses of Bookchin s writing

A Critique of Deep Ecology Richard Sylvan,1985

*Ecology as a First Principle* Craig Stewart Leedham,1991

*Ecological Experiments* Nelson G. Hairston,1989-11-24

Ecological Experiments stresses the importance to ecology of field experiments where variables are manipulated in order to collect data on specific hypotheses as opposed to the more passive observational method The book begins by introducing a series of ecological questions that can be addressed experimentally for example what is the significance of competition among species The minimal requirements of experimental design that must be met are then introduced together with examples of good and poor experiments from the ecological literature and a consideration of the trade offs that may be forced on the experimenter by field conditions All ecologists and especially students beginning their careers in field study will find in this text a good introduction to the experimental foundation of ecology

### **Ecological Feminist Philosophies**

Karen Warren, 1996-06-22 Pursues the connections between feminism and environmentalism This title includes topics the ecofeminist ethic the role of patriarchal concepts in perpetuating the domination of women and nature the grassroots origins and character of a thoughtful ecofeminism and the Ecofeminism deep ecology debate in environmental philosophy Publisher

*The Capitalist Commodification of Animals* Brett Clark, Tamar Diana Wilson, 2020-11-30 This volume offers analysis regarding the historical transformations in the material conditions and ideological conceptions of nonhuman animals alienated speciesism the ecological crisis that is undermining the conditions of life for all species and the capitalist commodification of animals that results in suffering death and profits

Taylor, 1992 Is democracy hazardous to the health of the environment

*Surface Modeling* Tian-Xiang Yue, 2011-02-04

Although GIS provides powerful functionality for spatial analysis data overlay and storage these spatially oriented systems lack the ability to represent temporal dynamics which is a major impediment to its use in surface modeling However rapid development of computing technology in recent years has made real time spatial analysis and real time data visualization become realizable Based on newly developed methods Surface Modeling High Accuracy and High Speed Methods explores solutions to big error and slow efficiency problems two critical challenges that have long plagued those working in with geographical information system GIS and computer aided design CAD By developing high accuracy and high speed methods for surface modeling the book builds a bridge between the mathematical oriented theory of surface modeling and the user oriented application where the user is actually able to retrieve information on the method itself The author examines a novel method of high accuracy surface modeling HASM in terms of the fundamental theorem of surfaces He then analyzes the coefficient matrix and develops an adaptive method of HASM HASM AM a multi grade method of HASM HASM MG and an adjustment method of HASM HASM AD He uses numerical tests and real world studies to demonstrate that HASM AM HASM MG and HASM AD have highly accelerated computational speed especially for simulations with huge computational work Building on this the book discusses a HASM based method for dynamic simulation HASM FDS and then applies HASM methods to simulate terrains climate change ecosystem change land cover and soil properties It demonstrates HASM s potential for simulating population distribution human carrying capacity ecosystem services ecological diversity change

detection and wind velocity The book concludes with a discussion of the problems that exist in surface modeling on a global level and evaluates possible solutions to these problems *Population Dynamics* Bertram G. Jr. Murray,2013-07-22

*Population Dynamics Alternative Models* provides a theoretical framework of population dynamics This book contains seven chapters that discuss the controversies surrounding discussions on the explicit view of the subject Chapters 1 and 2 present a general introduction to the terminology the mathematical background and the philosophical approach that lie behind the theoretical development Chapter 3 contains a series of models accounting for variations in population growth rates sizes and fluctuations while Chapter 4 examines a model accounting for the evolution of life history patterns A more detailed examination of the effects of predation on prey populations especially with respect to determining a prey population s maximum sustainable yield is explored in Chapter 5 Chapter 6 highlights the interspecific competition theory in terms of the population dynamics models presented in a previous chapter Chapter 7 summarizes the developments in the population dynamics research studies This work will be of great value to ecologists biologists and population dynamics researchers

*The Future of Environmental Criticism* Lawrence Buell,2009-02-09 Written by one of the world s leading theorists in ecocriticism this manifesto provides a critical summary of the ecocritical movement A critical summary of the emerging discipline of ecocriticism Written by one of the world s leading theorists in ecocriticism Traces the history of the ecocritical movement from its roots in the 1970s through to its diversification and proliferation today Takes account of different ecocritical positions and directions Describes major tensions within ecocriticism and addresses major criticisms of the movement Looks to the future of ecocriticism proposing that discourses of the environment should become a permanent part of literary and cultural studies **Advances in Marine Biology** ,2003-05-28 Volume 44 is an eclectic volume with timely

reviews on invertebrate zooplankton growth rates and movements on marine fish and decapod crustaceans *Advances in Marine Biology* was first published in 1963 Now edited by A J Southward Marine Biological Association UK P A Tyler Southampton Oceanography Association UK C M Young Harbor Branch Oceanographic Institution USA and L A Fuiman University of Texas USA the serial publishes in depth and up to date reviews on a wide range of topics which will appeal to postgraduates and researchers in marine biology fisheries science ecology zoology oceanography Eclectic volumes in the series are supplemented by thematic volumes on such topics as *The Biology of Calanoid Copepods* Series features over 35 years of coverage of the research *Environmental Ethics* ,2005 *Spatial Analysis* Mark R. T. Dale,Marie-Josée Fortin,2014-09-11 Nowadays ecologists worldwide recognize the use of spatial analysis as essential However because of the fast growing range of methods available even an expert might occasionally find it challenging to choose the most appropriate one Providing the ecological and statistical foundations needed to make the right decision this second edition builds and expands upon the previous one by Encompassing the basic methods for spatial analysis for both complete census and sample data Investigating updated treatments of spatial autocorrelation and spatio temporal analysis Introducing detailed

explanations of currently developing approaches including spatial and spatio temporal graph theory scan statistics fibre process analysis and Hierarchical Bayesian analysis Offering practical advice for specific circumstances such as how to analyze forest Permanent Sample Plot data and how to proceed with transect data when portions of the data series are missing Written for graduates researchers and professionals this book will be a valuable source of reference for years to come

*Modeling Nature* Sharon E. Kingsland,1995-10-16 The first history of population ecology traces two generations of science and scientists from the opening of the twentieth century through 1970 Kingsland chronicles the careers of key figures and the field s theoretical empirical and institutional development with special attention to tensions between the descriptive studies of field biologists and later mathematical models This second edition includes a new afterword that brings the book up to date with special attention to the rise of the new natural history and debates about ecology s future as a large scale scientific enterprise
