A Critique of Sociological Reasoning Charles W. Smith, 1979 To find more information about Rowman and Littlefield titles please visit www.rowmanlittlefield.com *Sociological Reasoning* Rob Stones, 1996-07-03 While sociological modernists were outrageously presumptuous in their claims for sociological knowledge postmodernists have gone to another extreme in claiming that it has no more truth status than fiction Critical of both positions *Sociological Reasoning* develops an original typology of approaches to social scientific theory and research which is distinguished by its openness and reflexive awareness of rhetorical and methodological aspects of knowledge claims Laced with graphic illustrative examples this is a strikingly well written text that will appeal to students at undergraduate level and beyond [For Sociology: Renewal and Critique in Sociology Today](#) Alvin Ward Gouldner, 1973 [The Sociology of W. E. B. Du Bois](#) José Itzigsohn, Karida L. Brown, 2020-03-24 The first comprehensive understanding of Du Bois for social scientists The *Sociology of W E B Du Bois* provides a comprehensive introduction to the founding father of American sociological thought Du Bois is now recognized as a pioneer of American scientific sociology and as someone who made foundational contributions to the sociology of race and to urban and community sociology However in this authoritative volume noted scholars Jos Itzigsohn and Karida L Brown provide a groundbreaking account of Du Bois s theoretical contribution to sociology or what they call the analysis of racialized modernity Further they examine the implications of developing a Du Boisian sociology for the practice of the discipline today The full canon of Du Bois s sociological works spans a lifetime of over ninety years in which his ideas evolved over much of the twentieth century This broader and more systematic account of Du Bois s contribution to sociology explores how his theories changed evolved and even developed to contradict earlier ideas Careful parsing of seminal works provides a much needed overview for students and scholars looking to gain a better grasp of the ideas of Du Bois in particular his understanding of racialized subjectivity racialized social systems and his scientific sociology Further the authors show that a Du Boisian sociology provides a robust analytical framework for the multilevel examination of individual level processes such as the formation of the self and macro processes such as group formation and mobilization or the structures of modernity key concepts for a basic understanding of sociology *Sociological Analysis & Theory*, 1977 [Mid-American Review of Sociology](#), 1991 [Harvey Sacks and Ethnomethodology](#) Graham Button, 2025-10-09 Ethnomethodology and Conversation Analysis have made major inroads into the disciplines that make up the social sciences Although commonly run together under the title of EMCA what their relationship is to one another remains as elusive as the relationship between their respective founders Harold Garfinkel and Harvey Sacks This book clarifies the nature of these relationships demonstrating that Harvey Sacks studies of the sequential organisation of conversation are the cardinal example of what Garfinkel described as an ethnomethodological alternate to traditional social science However over the decades that have passed since Garfinkel developed ethnomethodology several confusions have arisen as to what he meant The author argues that these

have resulted in a blunting of Garfinkel's original intentions which compromise the adequacy of ethnomethodological description. In response, this book shows how Sacks' considerations of adequacy can ground ethnomethodology as a natural observational science that redirects it towards developing further coherent and precisely circumscribed bodies of work to those of Sacks' own coherent and precisely circumscribed studies. It will appeal to both new and existing scholars of ethnomethodology and conversation analysis as well as those with interests in social theory, methodology, and those who have taken up the relevance of conversation analysis for their research and are interested in the ethnomethodological heritage of conversation analysis.

Social Theory and Evaluative Reasoning Edmund Dahlström, 1995 *Digest; Review of Reviews Incorporating Literary Digest*, 1897 **The Sociological Review**, 1920 **Ethnographic Inquiry and Lived Experience** Wing-Chung Ho, 2019-01-15 Ho addresses two fundamental theoretical questions about how best to practice ethnographic inquiries to obtain qualitative experience and shareable accounts of human living. The first question is regarding the epistemology of ethnography. Ho posits that writing is epistemologically prior to the researcher's fieldwork experience in the production of ethnographic knowledge. This stance is developed using the theories of hermeneutics put forward by Paul Ricoeur and Hans Georg Gadamer, who both consider that once a text is produced its meaning is dissociated from the intention of the author. The second question is what is the putative object that the ethnographer writes about. Ho argues that lived experience (*Erlebnis*) offers such an ethnographic object. Since the lived experience that an ethnographer experiences during fieldwork cannot be studied directly, further theorizations of lived experience are necessary. Ho underscores both the non-discursivity and transcendence of lived experience in the lifeworld and the way power is clandestinely imbued in everyday life in shaping subjectivity and practice. This theorization brings together Alfred Schutz's lifeworld theory and Michel Foucault's power/knowledge nexus. The result is a general theory of experience that is pertinent for ethnographic inquiries. By addressing these two fundamental questions and offering novel angles from which to answer them, this book offers refreshed epistemological guidelines for conducting ethnographic research for scientific reasoning. More importantly, this book also provides a crucial knowledge base for comprehending the current epistemological debates inherent in the production of ethnographic knowledge and furthering discussions in the field.

Communicative Reason Patrick O'Mahony, 2024-09-30 The book examines philosophical and sociological approaches within critical theory and more widely from the vantage point of communicative reason. It seeks to revitalize the sociological dimension of critical theory by advancing a critical sociology of reason. It does so fully in the knowledge that reason is a contentious concept in sociology and other disciplines. Nonetheless, building on Habermas's original insight, it argues that an extensively modified version of communicative reason is indispensable. This modified approach will draw extensively from Peirce's pragmatist semiotics and critical cognitive sociology. Such a focus has significant implications for meta-theoretical, theoretical, empirical, and methodological approaches in critical theory, critical sociology, and related disciplines. This book will be of interest to readers

in the social sciences humanities and philosophy who value the importance of a social theory of a reasonable society for their disciplines and for increasingly essential interdisciplinary activities The book will also appeal to many in critical theory and beyond who are interested in the cognitive foundations of normative orders including unjust or pathological as well as actually or potentially just foundations The book emphasizes both validity and critique within communicative reason and critical theory and accordingly presents a distinctive perspective on critical reconstructive research

Radical Critiques of the Law Stephen M. Griffin, Robert C. L. Moffat, 1997 The past two decades have seen an outpouring of work in legal theory that is self consciously critical of aspects of American law and the institutions of the liberal state In this lively volume eminent scholars in philosophy law and political science respond to this recent scholarship by exploring what constitutes a radical critique of the law examining such theories as critical legal studies feminist theory and theories of difference and critical race theory The authors consider whether the critiques advanced in recent legal theory can truly be called radical and what form a radical critique of American law should take Writing at the cutting edge of the critique of critical legal theory they offer insights first on critical legal scholarship then on feminist political and legal theory A third group of contributions questions the radicalness of these approaches in light of their failure to challenge fundamental aspects of liberalism while a final section focuses on current issues of legal reform through critical views on criminal punishment including observations on rape and hate speech Each major essay describes the underlying principles in the development of a radical legal theory and addresses unresolved questions relating to it while accompanying commentaries present conflicting views The resulting dialogue explores wide ranging issues like equity value relativism adversarial and empathic legal advocacy communitarianism and the social contract impartiality and contingency natural law and corrective justice A common thread for many of the articles is a focus on the social dimension of society and law which finds the individualism of

prevailing liberal theories too limiting Radical Critiques of the Law is particularly unique in presenting critical and feminist approaches in one volume along with skeptical commentary about just how radical some critiques really are Proposing alternative critiques that embody considerably greater promise of being truly radical it offers provocative reading for both philosophers and legal scholars by showing that many claims to radicalism are highly problematic at best *American Sociological Review* ,1958-02 *Choice* ,1979 *Harvard Law Review* ,1922
