Crm For The Common Man:

Global Air Transport Management and Reshaping Business Models for the New Era Kankaew, Kannapat, 2022-05-27 The air transport industry is highly vulnerable to environmental changes as was seen when the recent COVID 19 pandemic caused most airline operations to cease. However for decades airlines have been collapsing around the globe as the business of managing airline operations has become stressed due to price competition. This is detrimental to air carriers since air transport products and services are the same. Moreover it impacts other industries such as tourism hotels and restaurants which contribute to the derailment of economic and social activities. Thus it is essential to determine new practices and strategies that can allow air transport management to be enriched and to flourish. *Global Air Transport Management and Reshaping Business Models for the New Era* provides a comprehensive collection of knowledge on the new era of business management on air transport. It provides strategies, technologies and tools used in the reshaping of the air transport business model. Covering topics such as customer experience, robotic process automation and airline alliances, this major reference work is an essential resource for airline managers, supply chain specialists, air transport managers, students and faculty of higher education, libraries, researchers, economists, government officials and academicians. *CRM (customer Relationship Management) for the Common Man* Russ Lombardo, 2003 This book serves as a business planning tool for any company.
