Cross National Longitudinal Research On Human Development And Criminal Behavior:

Cross-National Longitudinal Research on Human Development and Criminal Behavior E. Weitekamp, Hans-Jürgen Kerner, 2012-12-06 Background In July of 1992 approximately sixty scholars and researchers met for a week at the Fritz Erler Akademie in Freudenberg Germany to participate in a workshop entitled Cross National Longitudinal Research on Human Development and Criminal Behavior The participants represented 15 nations and 45 universities and research centers Although longitudinal research in criminology has a long history this workshop represented the first one in the field of criminology in which it was attempted to get together the main scholars in this field from around the world The largest group of the workshop represented American scholars 19 a reflection of the fact that longitudinal research in criminology is predominantly conducted in North America This volume is the result of the workshop process and in particular of the invitations to participants to prepare pre or conference papers The chapters in this volume were selected from a larger set of pre or conference papers As workshop conveners and volume editors it falls to us to set some of the context for this enterprise Longitudinal research in criminology became a major approach after the publication of the landmark study by Wolfgang Figlio and Sellin Delinquency in a Birth Cohort in 1972 Around the same time when Wolfgang Figlio and Sellin started their Philadelphia cohort study were longitudinal studies although different in scope and aim launched by Shannon in the USA West in England Janson in Sweden and Goppinger in Germany

The Routledge International Handbook of Life-Course Criminology Arjan Blokland, Victor van der Geest, 2017-03-16 Since its introduction in the latter half of the 1980s the meticulous study of distinct criminal career dimensions like onset frequency and crime mix has yielded a wealth of information on the way crime develops over the life span Policymakers in turn have used this information in their efforts to tailor criminal justice interventions to be both effective and efficient Life course criminology studies the ways in which the criminal career is embedded in the totality of the individual life course and seeks to clarify the causal mechanisms governing this process The Routledge International Handbook of Life Course Criminology provides an authoritative collection of international theoretical and empirical research into the way that criminal behavior develops over the life span which causal mechanisms are involved in shaping this development and to what degree criminal justice interventions are successful in redirecting offenders criminal trajectories Drawing upon qualitative and quantitative research this handbook covers theory describes and compares criminal career patterns across different countries tests current explanations of criminal development and using cutting edge methods assesses the intended and unintended effects of formal interventions This book is the first of its kind to offer a comprehensive overview of state of the art developments in criminal career and life course research providing unique perspectives and exclusive local knowledge from over 50 international scholars This book is an ideal companion for teachers and researchers engaged in the field of developmental and life course criminology

Handbook on Crime and Deviance Marvin D. Krohn, Nicole Hendrix, Gina Penly Hall, Alan J. Lizotte, 2019-08-28 This

2nd edition of the Handbook provides an interdisciplinary coverage of new understandings of the most important developments in the sociology of crime and deviance that is current and emerging for research methodology practice and theory in criminology. It fosters research to take the fields of criminology and criminal justice in new directions. Unlike any other handbook, it includes chapters on cutting edge quantitative data and analytical techniques that are shaping the future of empirical research and expanding theoretical explanations of crime and deviance. It further devotes a section to the most current and innovative methodological issues. Chapters are updated, providing an inclusive discussion of the current research and the theoretical and empirical future of crime and deviance. This handbook is of great interest for advanced undergraduates, graduates, students, researchers, and scholars in criminology, criminal justice, sociology, and related fields such as social welfare, economics, and psychology.

Handbook of the Life Course Jeylan T. Mortimer, Michael J. Shanahan, 2007-12-14. This comprehensive handbook provides an overview of key theoretical perspectives, concepts, and methodological approaches that while applied to diverse phenomena, are united in their general approach to the study of lives across age phases. In surveying the wide terrain of life course studies with dual emphases on theory and empirical research, this important reference work presents probative concepts and methods and identifies promising avenues for future research.

Approaches to Positive Youth Development Rainer K. Silbereisen, Richard M. Lerner, 2007-08-21. Scientific research and science-guided practice based on the promotion of an individual's strengths constitutes a radical shift in a new and growing area of study within the field of human development. Its trademark term is positive youth development. This approach to human development is based on the idea that in addition to preventing problems, science and practice should promote the development of competencies, skills, and motivation in order to enhance individuals' developmental pathways. Approaches to Positive Youth Development is based on this concept and brings together authors from across Europe and America who are leaders in their respective fields. The main focus of the book, beyond a clarification of the paradigmatic foundations, concerns the major contexts of adolescents and young adults, namely, neighbourhoods and leisure locales, school, and family, and the major themes of healthy psychosocial development, namely, competences and knowledge, prosocial behaviour, transcending problems of delinquency, civic engagement, identity, agency, and spirituality.

Offending from Childhood to Late Middle Age David P. Farrington, Alex R. Piquero, Wesley G. Jennings, Darrick J. Liff, 2023-05-29. This second edition book advances knowledge about criminal careers throughout life. It presents new results from the Cambridge Study in Delinquent Development (CSDD), which is a unique longitudinal study of the development of offending from age 10 to age 61. Previous results obtained in the CSDD are reviewed, and then new findings from official criminal records up to age 61 are presented on offending at different ages, continuity in offending, ages of onset, and criminal career duration. The number of offenders and offenses between ages 50 and 61 is noteworthy. The book then presents results on self-reported offending in different age ranges up to 48, on prevalence, frequency, continuity, and comparisons with official records that suggest that official records

only capture the tip of the iceberg of offending It then analyzes different trajectories of official offending up to age 61 and shows to what extent they could be predicted by childhood risk factors New results from the CSDD in the last 10 years are then presented followed by a discussion of the relevance of all the findings for criminological theories and public policies such as early intervention This book should be of great interest not only to academics but also to policy makers and practitioners who are concerned with crime

Prevention As Altering the Course of Development Jennifer L. Maggs, John E. Schulenberg, 2001-09-01 Prevention and developmental sciences have many complementary goals and much to gain by collaboration With random assignment to conditions and long term multivariate follow up of individuals across significant years in the life span fundamental basic and applied research questions can now be addressed using new statistical methods This special issue includes four empirical papers that used growth modeling techniques hierarchical linear modeling latent growth curve analyses to examine direct and indirect effects of theory based longitudinal prevention experiments on developmental trajectories of children s and adolescents substance use delinquency and school bonding

International Journal of Comparative and Applied Criminal Justice ,2009 Developmental and Life Course Studies in Delinquency and Crime Arie Aart Jan Blokland, 2006 This collection of empirical studies from the Dutch Development and Life Course research focuses on explaining the development of anti social delinquent and criminal behavior from childhood to adulthood The book s introductory chapter briefly introduces the key points of debate within DLC Sections introductions further place the selected readings within the larger DLC frame

Developmental Psychopathology, Volume 3 Dante Cicchetti, Donald J. Cohen, 2006-03-31 Developmental Psychopathology Volume 3 Risk Disorder and Adaptation provides a life span developmental perspective on high risk conditions and mental disorders Moreover it examines developmental pathways to resilient adaptation in the face of adversity

Cross-National Crime Jerome L. Neapolitan, 1997-10-28 This book describes various types and sources of crime and explanatory data available to study variation in crime across nations Problems with the data and appropriate methods for adjusting and analyzing the data are described A thorough review of theories and past cross national crime research is included This book intends to facilitate and stimulate quality cross national crime research The book notes past misuse of data such as using homicide rates unadjusted for attempts as well as inconsistencies and contradictions in past research The major theories and concepts which have been used to explain crime across nations are described in detail and critiqued Inconsistencies and contradictions in results are noted and avenues for future research are offered Methodological techniques issues and problems involved in analysis are also presented and new approaches to dealing with the resulting data are projected Extensive appendixes give information and contacts to researchers providing a network for research in cross national crime heretofore lacking
