Back in the USA Dawn Kepets, 1995 Assessing the Development of Cross-cultural Competence in Soldiers, 2010 The contemporary operational environment is often characterized by ambiguous multi cultural contexts where Army Soldiers must rapidly adapt

without extensive prior knowledge of a region or its people Ongoing training development efforts are addressing the need for general cross cultural competence but this broad competence must be clearly defined and assessed in order to determine if Soldiers are being adequately prepared To support this goal this research effort examined how cross cultural competence develops in Soldiers and how that competence supports mission success Using multiple methodologies including cognitive task analysis critical incident elicitation and review of existing models we developed a model of cross cultural competence that includes 28 knowledge skills attitudes and abilities KSAs over four levels of development This model will inform the development of metrics to assess Soldiers cross cultural competence and provide relevant feedback DTIC *Journal of Sociology and Social Welfare* ,1994 *Cross-cultural Training* Dharm P. Kauffmann, Judith N. Martin, Henry D. Weaver, 1992 Colleges and universities face the major problem of how to make a university education meaningful in a global society It is the thesis of this book that study abroad is one of the most powerful tools available for internationalizing the U S higher education curriculum After an Introduction giving a general overview of

the book the study begins with four student case histories showing that an individual student's maturity and the extent of his or her immersion in the host country's culture are two key variables that determine to what extent study abroad affects the student. The next two chapters suggest first that as they study abroad students develop intellectually in three ways: 1 through language study, 2 through courses in the student's majors that offer new perspectives, and 3 through knowledge acquisition in broad general areas; and second that as they study abroad students change in their perceptions of the host culture, their own culture, and global understanding. In chapter 5 a theoretical framework is proposed for understanding the effects of study abroad and the growth which results from it. The conclusion is reached that study abroad is not only a potentially powerful educational technique but also that program design and participant selection can have significant effects upon outcome. Finally a number of recommendations are offered whereby it is believed the effectiveness of study abroad programs in U.S. educational institutions can be increased and broadened.
