Crossing The Mainstream Multicultural Perspectives In Teaching Literature:

Crossing the Mainstream Eileen Iscoff Oliver, 1994 Intended to help literature teachers examine ways in which the traditional canon can be expanded to include diversity in curricular choices this book invites readers to work together to find new and better ways to introduce an ever changing student body to what has heretofore been either unacknowledged or undervalued The book is divided into three sections Part 1 Multicultural Literature for Whom develops a rationale for expanding the canon to include multicultural literature in every student s experience and also confronts the issue of censorship Part 2 Curricular Challenges Beyond Eurocentric Values begins the task of cataloging the multitude of literary works that might be included in the new repertoire and also explores the process of learning a different kind of critical analysis This section of the book also provides comprehensive bibliographies of African American Asian American Jewish Latino Native American and cross cultural literatures as well as bibliographies of literature addressing emotional mental and physical disabilities homelessness homosexuality older adults teenage suicide and Vietnam veterans Finally Part 3 Teaching Strategies for Multicultural Literature gives examples of how multicultural works can be incorporated into literature courses Also included are discussions of incorporating multicultural perspectives within composition classes assessing student writing and making interdisciplinary connections in teaching multicultural literature NKA

The Death and Resurrection of a Coherent Literature Curriculum Sandra Stotsky, 2012-06-14 This book is addressed to teachers who know that the secondary literature curriculum in our public schools is in shambles Unless experienced and well read English teachers can develop coherent and increasingly demanding literature curricula in their schools average high school students will remain at about the fifth or sixth grade reading level where they now are to judge from several independent sources This book seeks to challenge education policy makers test developers and educators who discourage the assignment of appropriately difficult works to high school students and make construction of a coherent literature curriculum impossible It first traces the history of the literature curriculum in our middle schools and high schools and shows how it has been diminished and distorted in the past half century It then offers examples of coherent literature curricula and spells out the cognitive principles upon which coherence is based Finally it suggests what English teachers in our public schools could do to develop a literature curriculum that gives all their students an adequate basis for participation in an English speaking civic culture

Teaching Strategies for Ethnic Studies James A. Banks,1997 The book is designed to help teachers conceptualize design and implement a democratic thoughtful and just curriculum that honors and reflects the experiences hopes and dreams of all Americans It describes knowledge concepts strategies and resources that teachers need to teach ethnic studies in the classroom For classroom teachers at all levels and those interested in gaining a better understanding of multicultural studies in the classroom *English Journal* ,1997 **Literature for Today's Young Adults** Kenneth L. Donelson,Alleen Pace Nilsen,1997 With 140 fewer pages than the fourth edition the fifth obviously has been tightened it s partly in the format with narrower margins and less white space Otherwise some text has been rephrased or rearranged and topics for example adolescent psychology given shorter shrift Coverage of Holocaust literature has been expanded and discussion of problem novels improved Sports books have been dumped in with humor movies and other stuff including humorous poetry which it seems the authors feel is the only kind teens read for pleasure other types of poetry as well as short stories and drama are relegated to the English classroom coverage of which has been enlarged The chapter on sf and fantasy is good on historical aspects but weak on today s writers A short list of Internet listserves and Web sites has been incorporated as part of using YA

literature in the library Once again updating of appendixes seems spotty Nevertheless this is useful as a resource for youth librarians and a tool for teaching YA literature Sally Estes **Standards in Practice, Grades 9-12** Peter

Smagorinsky,1996 This book presents five composites of teachers and students in action to portray and elaborate on the English Language Arts standards developed by the National Council of Teachers of English and the International Reading Association The book demonstrates that teaching and learning are not generic homogeneous activities that transcend time space and culture Each chapter long narrative in the book follows a classroom community through a unit of study geared to that community s unique social and cultural context with its own distinct set of values and with learners who bring these values to class The book thus reveals the situatedness of both teaching and learning It helps illustrate how every classroom teacher can adapt standards into a learner centered pedagogy that capitalizes on students strengths Contains a glossary Each chapter contains resources NKA **Six Lenses for Anti-oppressive Education** Kevin K.
