calendar, ed. by 'Stonehenge'. John Henry Walsh,1873 **Taxation of the Digital Economy** Gillian Neki,2020-03-16
 Bachelor Thesis from the year 2019 in the subject Law Tax Fiscal Law grade A University of Nairobi School of Law course
 Dissertation language English abstract This dissertation explores the concept of the digital economy its rapid growth and the
 tax challenges it has introduced both locally and internationally It examines the general characteristic of a sovereign state
 and its inherent right to tax source on income generated within its jurisdiction The dissertation attempts to investigate the
 taxability of the digital economy where business is conducted without the requirement of a physical presence a pre requisite
 for tax administration How can states and especially Kenya detect permanent establishment for purposes of tax
 administration for an economy that is heavily reliant on intangible assets and a business model based on data network effects
 and user generated content It therefore focuses and looks at the scope of Kenya s legislative and policy frameworks and its
 effectiveness in taxing the digital economy Digital businesses and especially multinational digital enterprises have been able
 to take advantage of the tax laws and policies that were written for an industrial age and are ill suited for today s digital
 economy The Action Plan on Base Erosion and Profit Shifting by the Organization for Economic Co operation and
 Development set out to answer the fundamental issues of BEPS aggressive tax avoidance planning strategies but it in itself
 fell short of expectations as it was not able to recommend practical implementable solutions that would close the gaps that
 exist in the digital economy tax administration The findings revealed that BEPS is not a single problem faced by all states but
 states face different BEPS problems and evaluate them from their own state centred perspectives Hence the development of
 many interim measures by different states to tax the digital economy as the international community is still trying to come to
 a consensus on the possible practical solutions The current Kenyan tax framework on taxation of the digital economy is
 obscure as only recent Bills tabled in Parliament try and address the issue in depth In light of the findings of this research it
 was established that the problem is not so heavy on laws and regulation on taxation of goods sold electronically but rather
 implementation of the applicable laws where they exist The paper finally recommends possible amendments to the Kenyan
 legal framework and the proposed amendments are assessed by means of comparison with what has taken place in other
 jurisdictions **Life** ,1999 **Mexico and Guatemala by Car: the Countries where Your Dollar Goes Far** Norman D.
