

SYMBOLS

1.0 GENERAL¹

This section is based on ASME Y14.5M-1994. Symbols unique to ANSI Y14.5M-1982 are also described for those who are contractually obligated to comply with the older standard.

1.1 Symbols permit consistency in the way dimensions and tolerances are specified, and each symbol has a clearly defined meaning. Symbols take less time to apply on a drawing than would be required to state the same requirements with words. The symbols also require considerably less space. See Figure 1.

Figure 1. Equivalent Symbol and Note

1.2 The symbols are presented in two groups for easier use of this section as a reference. General dimensioning symbols are shown first. Some of these symbols are also used in tolerance specifications. The second set of symbols are used for tolerances.

1.3 Symbol sizes are shown in the figures as values proportional to the letter 'h'. The letter 'h' represents the predominant character height on a drawing. If a symbol dimension is shown as 1.5h, and the predominant character height on the drawing is to be 3mm, then the symbol dimension is 4.5mm (1.5 x 3mm).

1.4 Symbol proportions defined in the standard are recommendations. Some companies find it desirable to vary from the recommended proportions for improved microfilm reproduction capability. Symbol proportions within a company, and certainly within a single drawing, should be consistent.

1.5 Symbols are not generally used in text or notes lists. Abbreviations and symbol names are used in text or notes lists.

2.0 GENERAL SYMBOLS

General symbols are used with dimensions to clarify the requirement defined by a dimension value and to minimize the number of words or abbreviations placed on a drawing.

¹ Figures in this section were created using AutoCAD software, a product of Autodesk, Inc. and plotted on a Suttermagraphics (Houston Instrument Engineered) DMP 140 series plotter.

2.1 *Diameter* - A diameter symbol is placed in front of any dimension value that is a diameter. See Figure 2.

Figure 2. Diameter Symbol

2.2 *Counterbore Symbol* - A counterbore symbol combined with a diameter symbol is placed in front of a specified counterbore or spotface diameter. See Figure 3.

Figure 3. Counterbore Symbol

2.3 *Countersink* - The countersink symbol combined with a diameter symbol is placed in front of a specified countersink diameter. See Figure 4.
