Dinosaurs Diamonds And Things From Outer Space The Great Extinction:

Dinosaurs, Diamonds, and Things from Outer Space David Brez Carlisle, 1995 Presents a new explanation of the Cretaceous Tertiary Boundary event **Cretaceous Project 200, Volume 1: The Cretaceous World** M.B. Hart, S.J. Batenburg, B.T. Huber, G.D. Price, N. Thibault, M. Wagnreich, I. Walaszczyk, 2025-04-02 The Cretaceous was first mentioned in the legend of a geological map largely centred on France published in 1822 by Jean Baptiste Julien d Omalius d Halloy Two hundred years of research have demonstrated that the Cretaceous records some of the highest sea levels atmospheric temperatures and extreme events in Earth history It was also a time of significant palaeogeographical changes and continental fragmentation This volume draws together a collection of papers that demonstrate these particularly Cretaceous events of warm climates sea level change and the impact of major volcanic events on the fauna and flora of the time Geochemical and stable isotope data are used to interpret these changing environments and their impact on the Cretaceous ecosystem The volume closes with a description of the recent drilling of the Chicxulub bolide impact site When the Asteroid Hits Allen A. Debus, 2024-10-04 The incomprehensible notion of a very large chunk of ice or rock from outer space smashing into the Earth has only become mainstream within the past two centuries Though early writers imagined the utterly fantastic consequences of comet collisions and speculated on the devastation they might wreak it was not until the 1980s when scientists finally resolved that dinosaurs were extinguished by an asteroid 66 million years ago This startling announcement captivated the media and tilted the science fiction world but in reality history may have been punctuated repeatedly by such events This book collects and analyzes ideas of asteroid comet and planetary impacts with Earth spanning two centuries from the first realization of extinctions in fossil records to the new millennium reflected in scores of sci fi stories films and televised science documentaries The author examines social and geopolitical fears tied to the prospect of a cosmic borne catastrophe Science fiction and speculation are artfully melded Dinosaur Memories Allen A. Debus, Diane E. Debus, 2002-06-07 Dinosaur memories are hard to forget Most who revel in the current renaissance in dinosaur science art fiction and movies or who enjoy the other appealing prehistoric animals so well popularized by the media have fond recollections of what it was like growing up dinosaur Together with wife Diane and his father Allen G Debus Allen A Debus unveils treasured dinosaur memories and stories about prehistoric animals and paleo people spanning from the cold blooded dinosaur era to the modern wave dinosaur renaissance Beginning with fondly recalled roadtrips to prehistoric places where T rex still reigns Dinosaur Memories ventures into the realm of thunder beasts and explores the rich pop cultural appeal of prehistoric animals If youve ever collected dinosaurs enjoyed fossil hunting or visits to see the old bones in museums Dinosaur Memories is a book youll still recall years from now Thirty five chapters are grouped into seven sections titled Roads Into Prehistory Thunder Beasts Dinosaur Worlds Fantasy Dinosaurs Fossil Trickery Paleo people and Rustlin up Dinosaurs **Perilous Planet Earth** Trevor Palmer, 2003-06-12 A readable account of the history of natural disasters throughout

history **The Cretaceous-Tertiary Event and Other Catastrophes in Earth History** Graham Ryder, David E. Fastovsky, Stefan Gartner, 1996-01-01 This volume attempts to explore and clarify the relationship among the geological records the extinctions and the causes of catastrophes for life in Earth's history Most of the papers address the geological record and the extinctions across the Cretaceous-Tertiary boundary and the buried Chicxulub structure that is now consensually deemed to be of impact origin and to be intimately related to that boundary GSA website **Controversy Catastrophism and Evolution** Trevor Palmer, 2012-12-06 In *Controversy* Trevor Palmer fully documents how traditional gradualistic views of biological and geographic evolution are giving way to a catastrophism that credits cataclysmic events such as meteorite impacts for the rapid bursts and abrupt transitions observed in the fossil record According to the catastrophists new species do not evolve gradually they proliferate following sudden mass extinctions Placing this major change of perspective within the context of a range of ancient debates Palmer discusses such topics as the history of the solar system present day extraterrestrial threats to earth hominid evolution and the fossil record *Proceedings of the Seventh International Workshop on Agglutinated Foraminifera* Michael Anthony Kaminski, R.
