Technical Resource Document, 1987 The 1984 Hazardous and Solid Waste Act Amendments to the Resource Conservation and Recovery Act RCRA directed EPA to ban certain dioxin containing wastes from land disposal unless EPA determines that restrictions on land disposal of these wastes are not needed to protect human health and the environment Congress through the 1984 Amendments fixed a deadline of 24 months from the enactment of the Amendments for EPA to regulate the land disposal of these identified wastes with some exceptions In the event that the Agency has not issued regulations by that time November 1986 land disposal of all specified dioxin containing waste streams automatically will be banned An important aspect of the land disposal restrictions is the identification and evaluation of alternative technologies that can be used to treat the listed wastes in such a way as to meet proposed treatment levels which EPA has determined are protective of human health and the environment If alternatives to land disposal are not available by November 1986 it may

be necessary to extend the deadline for the restrictions on land disposal The full report identifies and evaluates alternative technologies that remove and or destroy dioxin and related compounds from listed dioxin wastes in order to achieve constituent levels that allow the safe land disposal of the treated residues      **Hazardous Materials and Waste**
