Question Bank Based on New Syllabus *Waste Not Want Not* Robert Allen, 2013-11-05 No one wants toxic waste dumped
in their back yard Dioxins and furans from incinerators dangerous chemicals leaching from landfill sites and the apparently
random dumping of nuclear waste are all clear threats to our health and lives In fact any waste not properly dealt with can
become dangerous yet industry and state seem to collude recklessly in its production Robert Allen describes the waste
produced in Britain and Ireland and the woefully inadequate means of dealing with it He looks too at governmental
intransigence and dishonesty and at industry s refusal to consider the needs of local communities He also gives an account of
the available legislation governing toxic waste and the degree to which it will need radical change in the face of a rapidly
growing problem Waste dumping impinges on people s lives and he examines some of the very successful campaigns against
the many ill considered dumping grounds As governments only respond to pressure there are valuable lessons to be learnt
from these campaigns This book sets out the nature of the problem and provides a basis on which to tackle it Originally
