Diplomats Scientists Politicians:

The SAGE Handbook of Diplomacy Costas M. Constantinou, Pauline Kerr, Paul Sharp, 2016-08-12 The SAGE Handbook of Diplomacy provides a major thematic overview of Diplomacy and its study that is theoretically and historically informed and in sync with the current and future needs of diplomatic practice Original contributions from a brilliant team of global experts are organised into four thematic sections Section One Diplomatic Concepts Theories Section Two Diplomatic Institutions Section Three Diplomatic Relations Section Four Types of Diplomatic Engagement *Science and Diplomacy* Mauro Galluccio, Ph.D., 2021-01-06 This book lays the groundwork for a new field of study and research in the intersection between science and diplomacy It will review the multi disciplinary research in this burgeoning area in providing the scientific foundation for the application of psychological principles to understanding and facilitating political decisions in an international context Focusing on how people think act and feel on both individual and collective levels this book takes into account a realistic perspective from which transformative processes can emerge It follows the ongoing debate in the EU and the world in providing a better understanding of the tools that can be deployed to improve communication and cooperation between scientists politicians and diplomats in this field The failure of communication in this COVID 19 planetary crisis has not been about whether or not objectives have been achieved but about the ability of major actors to cooperate to forge links with people The way policymakers and scientists will manage their interpersonal negotiations will be of great importance in fostering international cooperation and coordinated problem solving behaviours Otherwise science diplomacy will lose sight of its most important purpose that of helping to solve problems conflicts and diplomatic processes for the sake of humanity

A Diplomacy of Hope Albert Legault, Michel Fortmann, 1992 A Diplomacy of Hope is the first comprehensive survey of the history of Canadian diplomacy in the area of arms control and disarmament Taking much of their information from Canadian archival sources Albert Legault and Michel Fortmann cover all major negotiations on arms control and disarmament in which Canada has participated since 1945 *Science, (Anti-)Communism and Diplomacy*, 2019-10-01 From 1957 onwards the Pugwash Conferences brought together elite scientists from across ideological and political divides to work towards disarmament Through a series of national case studies Austria China Czechoslovakia East and West Germany the US and USSR this volume offers a critical reassessment of the development and work of Pugwash nationally internationally and as a transnational forum for Track II diplomacy This major new collection reveals the difficulties that Pugwash scientists encountered as they sought to reach across the blocs create a channel for East West dialogue and realize the project s founding aim of influencing state actors Uniquely the book affords a sense of the contingent and contested process by which the network like organization took shape around the conferences Contributors are Gordon Barrett Matthew Evangelista Silke Fengler Alison Kraft Fabian L scher Doubravka Ol kov Geoffrey Roberts Paul Robinson and Carola Sachse

From Dissent to Diplomacy: The Pugwash Project During the 1960s Cold War Alison Kraft, 2022-10-22 This book provides

new and critical perspectives on the internal development of the Pugwash Conferences on Science and World Affairs the PCSWA Pugwash and its role in international nuclear diplomacy during the 1960s Cold War Conceived by western scientists dissenting from their own government's position on nuclear weapons the conferences brought together elite scientists from across the East West divide to work towards nuclear disarmament and for peace The analysis follows two lines First the book charts the emergence during the conferences of a distinctive form of technopolitical communication that was crucial to the role of Pugwash in Informal cross bloc dialogue about disarmament This enabled Pugwash to realize its paradoxical vision of working both with and against governments to promote disarmament and was key to its role as both a forum for and actor within the realm of informal diplomacy It is argued that Pugwash scientists formed the vanguard of what came in the 1960s to be called Track II diplomacy The relevance of the contemporary concept of Science Diplomacy for Pugwash is discussed The second analytical focus of the book centers on the internal dynamics of the international Pugwash organization It is argued that informal modes of working and a code of confidentiality accorded the leadership enormous power and autonomy this small network of senior figures was able to control the Pugwash agenda and priorities and to launch diplomatic initiatives beyond the conferences However by 1967 competing interests were fueling tensions and instability within Pugwash as it struggled for coherence and direction amid with the political challenges posed by the Vietnam War and European security This crisis manifest the limits of the Pugwash project and placed its future in doubt
