Directions in Large-Scale Systems Y. Ho, 2012-12-06 This book is the record of papers presented at the Conference on Directions in Decentralized Control Many Person Optimization and Large Scale Systems held at the Colonial Hilton Inn Wakefield Massachusetts from September 13 1975 Our motivation for organizing such a conference was two fold Firstly the last few years have seen a great deal of activity in the field of Large Scale Systems Theory and it has been certainly one of the dominant themes of research in the disciplines of Systems and Control Theory It therefore seemed appropriate to try and take stock of what had been accomplished and also try to invent the future directions of research in this field Secondly the 6th World IFAC Conference was being held in Cambridge Massachusetts the week earlier and it provided an ideal opportunity for taking advantage of the presence of a large number of specialists from all parts of the world to organize a small conference where a free exchange of ideas could take place It is left to the readers of this volume to judge to what extent we have been successful in our above mentioned goals There is no accepted definition of what constitutes a large scale system nor what large scale system theory is While this diversity does suggest that the field whatever it may turn out to be is in a state of flux it does not necessarily imply chaos
