Deborah Marks, 1999 **Social Histories of Disability and Deformity** David M. Turner, Kevin Stagg, 2006-09-27

Collecting together essays written by an international set of contributors this book provides an important contribution to the emerging field of disability history It explores changes in understandings of deformity and disability between the sixteenth and twentieth centuries and reveal the ways in which different societies have conceptualised the normal and the pathological Through a variety of case studies including early modern birth defects homosexuality smallpox scarring vaccination orthopaedics deaf education eugenics mental deficiency and the experiences of psychologically scarred military veterans this book provides new perspectives on the history of physical sensory and intellectual anomaly Examining changes over five centuries it charts how disability was delineated from other forms of deformity and disfigurement by a clearer medical perspective Essays shed light on the experiences of oppressed minorities often hidden from mainstream history but also demonstrate the importance of discourses of disability and deformity as key cultural signifiers which disclose broader systems of power and authority citizenship and exclusion The diverse nature of the material in this book will make it relevant to scholars interested in cultural literary social and political as well as medical history Perspectives on Disability and Rehabilitation Karen Whalley Hammell, 2006-02-22 The eBook version of this title gives you access to the complete book content electronically Evolve eBooks allows you to quickly search the entire book make notes add highlights and study more efficiently Buying other Evolve eBooks titles makes your learning experience even better all of the eBooks will work together on your electronic bookshelf so that you can search across your entire library of Occupational Therapy eBooks Please note that this version is the eBook only and does not include the printed textbook Alternatively you can buy the Text and Evolve eBooks Package which gives you the printed book plus the eBook Please scroll down to our Related Titles section to find this title The book provides an accessible introduction to many of the current theoretical perspectives on disability enabling readers to challenge the taken for granted nature of traditional knowledge and assumptions within the rehabilitation health and community care industries and encouraging a more critical approach both to the nature of rehabilitation following injury or illness and to the problem of physical difference and disability Through its interrogation and exploration of new theoretical perspectives on disability and rehabilitation this book provides a unique text for students and practitioners of nursing

occupational therapy physiotherapy and social work and for educators and researchers in these fields Although rehabilitation practitioners claim to aspire to client centred practice and advocate participatory modes of research rehabilitation theory remains curiously estranged both from theoretical perspectives developed by disabled disability theorists and from critical perspectives on disability that are emerging from other academic disciplines Thus immune from alternate views rehabilitation practitioners fail to question the premise that their professional assumptions are correct or right Contemporary theorists raise important questions for example about professional power concepts of normality independence and the physical body issues central to rehabilitation as well as to the role of the cultural environment in producing prejudice the role of the social environment in creating disadvantage and to issues of power and privilege and of the systemic oppression of disabled people This book provides an introduction to the expanding body of critical work on disability by theorists from a range of perspectives illustrating ways in which their theories and insights contest or support assumptions within rehabilitation theory The book argues for a cross fertilisation of ideas and challenges hierarchies of power in which nurses and therapists privilege their own assumptions perspectives and knowledge while overlooking or ignoring the perspectives both of disabled people and of other theorists Provides an accessible introduction to current theoretical perspectives on disability Demonstrates how these theoretical perspectives can inform a practitioner's approach to rehabilitation Relevant for all the rehabilitation and health care professions

Perspectives on Wellbeing, 2019-06-24 The study of wellbeing is not new Over two millennia ago the Ancient Greeks were already debating different conceptions of the good life and how it may be fostered albeit a debate for the privileged in ancient Greek society More recently the post WWII concern with economic scarcity gave way as prosperity rose in the later 20th century to values such as personal growth and social inclusion In parallel research has increasingly turned its focus to wellbeing going beyond traditional measures of income wealth and employment Greater attention is now paid to the subjective experience of wellbeing which it is broadly agreed has many dimensions such as life satisfaction optimal functioning and a good quality of life *Perspectives on Wellbeing A Reader* brings together a number of chapters that examine wellbeing from different disciplinary perspectives A number of the chapters take the angle of human flourishing looking at the respective contributions of belonging emotional resilience spirituality prosocial behaviour literacy and leisure Others look at wellbeing through a social relations lens including family relations youth persons with disability and gender Finally a chapter on wellbeing and economics illustrates different approaches to measuring wellbeing and identifying its determinants The book concludes with a chapter that argues for the enduring importance of the welfare state if the wellbeing of all is to be ensured This book is likely to be of interest to both undergraduate and postgraduate students in the social sciences as well as to a general readership Contributors are Angela Abela Andrew Azzopardi Paul Bartolo Marie Briguglio Amy Camilleri Zahra Joanne Cassar Marilyn Clark Ruth Falzon Vickie Gauci Ingrid Grech Lanfranco Natalie Kenely Mary Anne Lauri Marceline Naudi Claudia Psaila Clarissa Sammut Scerri

Sandra Scicluna Calleja Barbara Stelmaszek Sue Vella and Val Williams *Disability and Social Theory* D. Goodley, B. Hughes, L. Davis, 2012-06-01 This comprehensive interdisciplinary collection examines disability from a theoretical perspective challenging views of disability that dominate mainstream thinking Throughout social theories of disability intersect with ideas associated with sex gender race ethnicity class and nation *Disability as a Fluid State* Sharon N. Barnartt, 2010-11-10 Disability is often described in a way that suggests it is a permanent relatively stable state This volume argues that the relationship between impairment physical state and disability is neither fixed nor permanent but is fluid and not easily predicted **Motherhood and Disability** O. Prilleltensky, 2004-05-25 This book explores the intersection between motherhood and physical disability It is based on a study that focused on the lived experiences of women with physical disabilities mothers and non mothers What meaning does motherhood have for these women What is it like for them What messages do they receive about themselves as women with or without children What barriers do they foresee and or come across These issues are explored from the vantage point of disabled women with and without children **Disabling Diversity** Katie Ellis, 2008 Disability & the Politics of Education Susan Lynn Gabel, Scot Danforth, 2008 Disability and the Politics of Education An International Reader is a rich resource that deals comprehensively with the many aspects of the complex topic of disability studies in education For nearly two decades global attention has been given to education as a human right through global initiatives such as Education for All EFA and the Salamanca Statement Yet according to UNESCO reaching the goals of EFA remains one of the most daunting challenges facing the global community Today millions of the world's disabled children cannot obtain a basic childhood education particularly in countries with limited resources Even in the wealthiest countries many disabled children and youth are educationally segregated from the nondisabled particularly if they are labeled with significant cognitive impairment International agencies such as the United Nations and the World Bank have generated funds for educational development but unfortunately these funds are administered with the assumption that west is best thereby urging developing countries to mimic educational policies in the United States and the United Kingdom in order to prove their aid worthiness This McDonaldization of education reproduces the labeling resource allocation and social dynamics long criticized in disability studies The authors in this volume explore these subjects and other complexities of disability and the politics of education In doing so they demonstrate the importance and usefulness of international perspectives and comparative approaches Ending Disability Discrimination Gary E. May, Martha B. Raske, 2005 Ending Disability Discrimination defines disability as a social construction not as an immutable physical limitation and gives social work students and practitioners a model that can be used to transform how people with disabilities are treated Highlights Uses an innovative model for understanding disability that draws upon a concept familiar to social work students discrimination Chapter 5 Presents disability related impairment as a consequence of discrimination making the target system the social environment rather than the person with the disability a viewpoint that shows commitment to social justice and
