Disadvantage And Education:

Disadvantage and Education Jo Mortimore, Tessa Blackstone, 1982 **Overcoming Disadvantage in Education** Stephen Gorard, Beng See, 2013-08-22 Governments local authorities school leaders and teachers all over the world want to improve the educational attainment and participation of all students and to minimise any systematic differences in outcomes for social and economic groups A particular concern is for those students from backgrounds that may objectively disadvantage them at school and beyond However considerable effort and money is currently being wasted on policies practices and interventions that have very little hope of success and that may indeed endanger the progress that is being made otherwise The poor quality of much education research evidence coupled with an unwillingness among users of evidence to discriminate appropriately between what we know and do not know means that opportunities are being missed At a time of reduced public spending it is important that proposed interventions are both effective and efficient Overcoming Disadvantage in Education is unique in the way that it Shows where the solutions to underachievement and poverty lie combines primary new secondary official and published review evidence distinguishes between those possible causes of underachievement that are largely fixed for individuals and those that are modifiable There are evidence informed ways forward in handling under achievement and increasing social justice in education This book shows which the more likely approaches are and where further work could yield further benefits This book will be a key text for students developing academic researchers and supervisors in the social sciences and for those research users charged with improving educational outcomes Beyond Educational Disadvantage Paul Downes, Ann Louise Gilligan, 2007 *Can School Improvement Overcome the Effects of Disadvantage?* Peter Mortimore, Geoff Whitty, 2000 When this book was first published in 1997 the relationship between pupils backgrounds and their school achievement has received little attention in education discussions Although there has been more recognition of the problem the correlation between disadvantaged family background and low achievement persists The authors have revised and updated their discussion of what disadvantage can mean for pupils the strategies that have been adopted to combat it and the efficacy of these programmes The authors argue that efforts to compensate at school for disadvantage at home have been too limited in scope They endorse school improvement work which has established mechanisms for whole school change but fear that claims for its significance may have been exaggerated They consider that if the achievement gap between the advantaged and their disadvantaged peers is to be closed the present government must go beyond its work on school improvement It should better co ordinate initiatives that seek more directly to help the disadvantaged maintain those interventions which have proved to have positive effects and extend the opportunities for post school learning Responding to Poverty and Disadvantage in Schools Tamara Bibby, Ruth Lupton, Carlo Raffo, 2017-02-21 This book explores a range of challenges teachers face in dealing with situations of disadvantage and explores different ways of thinking about these situations Starting with a variety of incidents written by

teachers in schools in disadvantaged settings the book provides a range of ways of thinking about these some more psychological others more sociological and chapters develop conversations between teachers and academics These conversations will help teachers reflect more deeply on the contexts in which they work on what disadvantage means and how disadvantage manifests in practice It will also help teachers reflect upon the nature of their work what it means to be a good and effective teacher and the particular skills approaches relationships and competencies that may need to be developed in differing settings of educational disadvantage The book explores the tensions between different ways of thinking about education and disadvantage it will make compelling reading for students and teachers of education education policy makers and practising schoolteachers

Reducing Educational Disadvantage Penny Tassoni,2016 **Educational Disadvantage** John Donald Nisbet,Joyce S.

Watt,Judith A. Duncan,1984 **Reducing Educational Disadvantage: A Strategic Approach in the Early Years** Penny Tassoni,2016-05-05 Winner of the ERA award for Early Years On average children from low income backgrounds enter reception with lower scores in literacy and mathematics than their peers This book provides early years practitioners with the skills to narrow this gap In the early years children s cognitive development is largely shaped by their home environment but research shows that on average children who are entitled to free school meals start primary school with lower scores in reading and mathematics than their peers As an early years practitioner you can influence these children s learning within your setting and help them to achieve the same levels as their more affluent peers That s what this book aims to do help you to narrow the gap This unique book shows you how to provide a safety net for children who are most at risk of underachievement You will be taught about the different factors that positively impact upon children s learning including adult interaction and literacy and mathematical experiences and how they link to good practice within the EYFS From tips for creating a rich and diverse play environment for them to enjoy to suggestions on how to carefully guide activities and experiences this book will help you to establish a strong long term education programme You will be amazed at the impact you will have upon these children simply by making small changes to your practice and planning and you might even increase your setting s chance of gaining an outstanding Ofsted grade Educational Disadvantage and Early School Leaving (Demonstration Programme on Educational Disadvantage) ,1998 Moving Beyond Educational Disadvantage

Ireland. Educational Disadvantage Committee,2005 **Leading Disadvantaged Learners** David Middlewood,Ian

Abbott,Roberto Pamas,2021 Where schools working in adverse conditions are achieving outstanding learning outcomes what is it that these schools do to achieve these outcomes Are there common factors here which could apply everywhere or at least in the vast majority of circumstances Drawing on a range of research including interviews with children parents teachers and school leaders in rural and urban contexts in England Greece India Malaysia Seychelles South Africa Tanzania and the USA

the authorship team explores these important questions The excitement and enthusiasm for and a commitment to learning in which every single person there was involved seems to underpin the achievement While this often sprang from the school s leaders who set the tone and were highly visible inspirations to everyone else leadership was found at every level of these schools with people feeling empowered to lead and manage in the way that worked for their learners The book is filled with case studies showcasing examples of children and young people who have overcome huge disadvantages in their lives and circumstances to achieve their potential at school These children and young people are not super heroes but mostly children with normal abilities and talents who have succeeded thanks to highly effective work and strategies by leaders teachers and staff in their schools Whilst some of the obstacles which prevent disadvantaged children from achieving in education can only be removed through changing features of certain education systems themselves there are clear identifiable strategies to be used and actions that can be taken in any school to raise the achievement of those children from disadvantaged contexts After describing and analysing the causes and consequences of various kinds of disadvantage the book puts forward key principles and show how they underpin actions and strategies for leaders and others to apply in their schools at whole school classroom and individual level
