Disarmed Democracies Domestic Institutions And The Use Of Force:

Disarmed Democracies ,2010 In *Disarmed Democracies Domestic Institutions and the Use of Force* David P Auerswald examines how the structure of domestic political institutions affects whether democracies use force or make threats during international disputes Auerswald argues that the behavior of democracies in interstate conflict is shaped as much by domestic political calculations as by geopolitical circumstance Variations in the structure of a democracy's institutions of governance make some types of democracies more likely to use force than others To test his theory Auerswald compares British French and U S behavior during military conflicts and diplomatic crises from the Cold War era to the present He discusses how accountability and agenda control vary between parliamentary presidential and premier presidential democracies and shows how this affects the ability of the democracy to signal its intentions as well as the likelihood that it will engage in military conflict His findings have implications for the study of domestic politics and the use of force as well as of U S leadership during the next century This study will interest social scientists interested in the domestic politics of international security comparative foreign policy or the study of domestic institutions It will interest those concerned with the exercise of U S leadership in the next century the use of force by democracies and the future behavior of democratizing nations David P Auerswald is Assistant Professor of Political Science and International Affairs George Washington University

International Intervention and the Use of Force Cornelius Friesendorf,2012-05-14 Intervening states apply different approaches to the use of force in war torn countries Calibrating the use of force according to the situation on the ground requires a convergence of military and police roles soldiers have to be able to scale down and police officers to scale up their use of force In practice intervening states display widely differing abilities to demonstrate such versatility This paper argues that these differences are shaped by how the domestic institutions of sending states mediate between demands for versatile force and their own intervention practices It considers the use of force by Germany Italy the United Kingdom and the United States in three contexts of international intervention Bosnia and Herzegovina Kosovo and Afghanistan The paper highlights quite different responses to security problems as varied as insurgency terrorism organised crime and riots This analysis offers important lessons Those planning and implementing international interventions should take into account differences in the use of force At the same time moving towards versatile force profoundly changes the characteristics of security forces and may increase their short term risks This difficulty points to a key message emerging from this paper effective sustainable support to states emerging from conflict will only be feasible if intervening states reform their own security policies and practices

Militant Face of Democracy Anna Geis, Harald Müller, Niklas Schörnig, 2013-10-10 Democratic peace theory the argument that democracies very rarely go to war with each other has come under attack recently for being too naïve and for neglecting the vast amount of wars fought by democracies especially since the end of the Cold War This volume offers a fresh perspective by arguing that the same norms that are responsible for the democratic peace can be argued to be responsible for democratic war proneness The authors show that democratic norms which are usually understood to cause peaceful behaviour are heavily contested when dealing with a non democratic other The book thus integrates democratic peace and democratic war into one consistent theoretical perspective emphasising the impact of national identity The book concludes by arguing that all democracies have a weak spot where they would be willing to engage militarily *Democratic Wars* A. Geis, L. Brock, H. Mueller, 2006-02-28 The book turns the democratic peace theme on its head rather than investigating the reasons for the supposed pacifism of democracies it looks for the causes of their militancy In order to solve this puzzle the authors look across International Relations political theory political philosophy and sociology **Commitments, Credibility and International Cooperation** Michael John Tierney, 2003 **Parliaments and Foreign Policy** Michael Thomas Koch, 2002 **Democracy and War** David Rousseau, 2005-03-24 Introduction domestic institutions political norms and the evolution of international conflict The impact of institutions in international crises International disputes and the evolution of conflict Institutional constraint versus regime type Political norms versus institutional structures Democratization and international conflict The evolution of conflicts institutions and norms Conclusions International Affairs , 2001 Congress and the Politics of Foreign Policy Colton C. Campbell, Nicol C. Rae, John F. Stack, 2003 This volume explores the changing parameters of presidential congressional relations in the area of foreign policy It addresses the struggle between the three branches of government in view of increasing congressional assertiveness and the complexity of the president's multiple foreign policy agendas The essays constitute a comprehensive study on foreign policy making in the 21st century describing how foreign policy is actually made in Washington D C in such areas as trade arms control and proliferation alliances defense and intelligence budgets sanctions war power treaties and executive agreements financial aid diplomacy procedural legislation treaty ratification and advice and consent For anyone who wants to advance their understanding and appreciation for the role of three American institutions in the crafting of foreign policy making the United States Congress the American Presidency and the United States Supreme Court *Peace Research Abstracts Journal* , 2003 *Coalition Politics and the Iraq War* Daniel F. Baltrusaitis, 2010 Why do states join ad hoc military coalitions What motivated South Korea to contribute significantly to the Iraq War coalition of the willing while such steadfast allies as Turkey and Germany resisted US pressure to become burden sharing partners Drawing on his extensive examination of South Korean German and Turkish politics in the approach to and during the Iraq War Daniel Baltrusaitis offers an in depth analysis of how domestic political dynamics critically influence a state's level of material and diplomatic support to coalitions
