Project-Oriented Organization Martina Huemann, 2016-03-03 Organizations regularly assume that the culture values dynamic and organization of their temporary project organizations are merely a smaller version of the original parent Given that project organizations are made up of people and teams drawn in most cases from outside and inside the parent these assumptions are nonsensical But they do explain why the HR function finds it difficult to adapt to the project environment Martina Huemann s research in Human Resource Management in the Project Oriented Organization offers insight into an approach that is designed to align HR to the needs of the project organization in terms of management structure reward recruitment and performance systems The text analyses how the modern HR organization stacks up alongside the temporary

organization that is the project to identify the HR constraints and needs of the project organisation and offer a model of project oriented HRM Professor Huemann had a deep interest in how and why change processes come into existence and how to design and enable them In her book she endeavors to bridge theory and practice strategy and operations *Human Resource Management Theory and Research on New Employment Relationships* Dianna L. Dulebohn, 2016-10-01 This volume of the series Research in Human Resource Management HRM focuses on a number of important issues in HRM and OB including performance appraisal political skill gratitude psychological contracts the philosophical underpinnings of HRM pay and compensation messages and electronic human resource management For example the first article by Cleveland and Murphy considers a very controversial issue i.e. the reasons that organizations are abandoning the use of performance appraisal The next article by Harris Ferris Summers and Munyon is extremely interesting and focuses on how composite political skills e.g. social astuteness interpersonal influence helps individuals develop productive work relationships in organizations The third article by Scandura and Sharif presents a very innovative model of gratitude in organizations and the authors argue that gratitude is essential for maintaining positive social relations in organizations The fourth article by Suazo and Stone Romero provides an extremely comprehensive review of the theory and research on psychological contracts in organizations from 1960-2015 The subsequent article by Bae Kang and Kim presents a very unique perspective on HRM and considers the philosophical underpinnings of the field The sixth article by Murray Dulebohn Roehling and Werling presents a very innovative model to explain the role that organizational messages about changes in pay or compensation systems have on anticipatory pay satisfaction The final article in the series by Johnson Thatcher and Burleson presents a thought provoking framework for understanding the key role that information technology IT plays in the field of HRM The series should be useful to researchers and doctoral students in the fields of HRM OB and Industrial and Organizational Psychology It should also be relevant for doctoral courses and scientist practitioners in these fields

Johnson, Kevin D. Carlson, Michael J. and manage talent more effectively **Human Resource Information Systems** Michael J. Kavanagh, Richard D. Johnson, 2017-07-07 Human Resource Information Systems edited by Michael J Kavanagh and Richard D Johnson is a one of a kind book that provides a thorough introduction to the field of Human Resource Information Systems HRIS and shows how organizations today can leverage HRIS to make better people decisions and manage talent more effectively Unlike other texts that overwhelm students with technical information and jargon this revised Fourth Edition offers a balanced approach in dealing with HR issues and IT IS issues by drawing from experts in both areas Numerous examples best practices discussion questions and case studies make this the most student friendly and current text on the market New to This Edition A new chapter on social media explores how organizations can use social networks to recruit and select the best candidates A new HRIS Expert feature spotlights real world practitioners who share best practices and insights into how chapter concepts affect HR professions New and expanded coverage of key trends such as information security privacy cloud computing talent management software and HR analytics is included **Business Driven Technology** Stephen Haag, Paige Baltzan, Amy Phillips, 2006 Takes a business first approach to improve students perception of the value of IS within the business discipline This perspective allows instructors to demonstrate how technology and systems support business performance and growth This work enables the instructor to adjust content according to their business or technical preferences HRM in Mission Driven Organizations Chris Brewster, Jean-Luc Cerdin, 2017-10-10 This edited collection examines human resource management in organizations other than those that are set up to make a profit Covering human resource management in a number of different kinds of mission driven organizations the book explores organizations in sectors and industries such as the governmental and intergovernmental public sector volunteer organizations and charities religious organizations cultural organizations sports organizations and B corporations Recognizing the reality of management practice in the many small organizations covered by the book the chapters deal with the way that people are actually managed whether or not there is an HRM department present Students of business management and human resource management will find this book invaluable as a source of knowledge on not for profit organizations as many of the chapters include detailed examples and case studies *Disruptive Artificial Intelligence and Sustainable Human Resource Management* Anamika Pandey, Balamurugan Balusamy, Naveen Chilamkurti, 2023-12-14 It is well established that every organization is founded with a specific purpose and goals Virtually all business organizations obtain measurements and metrics dealing with outcomes and results However what is reflected on the balance sheet does not necessarily show the actual worth of the organizations and ensure their survival and sustainability Thus the question arises what exactly makes the organizations sustainable and thriving in an ever changing environment There are several examples of companies like Faber Castell Bank of Ireland Chivas DuPont and many more which have been able to sustain and survive over more than 200 years and still have a successful existence in the present era Thus it is important for the organization to pay equal attention to its three bottom lines i e people

profit and planet for its sustainability which not only meet the needs of the present generation but should have a futuristic approach as well. In the present era organizations are adopting a new normal working dynamic and coping with the post pandemic situations to sustain themselves in the business environment. Technology plays a significant role in this new working dynamic and cutting edge technologies like machine learning, artificial intelligence, blockchain, ChatGPT, Internet of Things and much more effectively facilitate human functioning at work. The book aims to contribute to understanding and developing sustainable human resource management processes and practices aligned with recent technologies. It highlights the interconnection among the three bottom line sustainable approaches for the growth and development of the organization. Topics discussed in this book include Disruptive Technologies and HR Sustainability, Convergence of Innovative Technologies, HR and Organizational Growth, Triple bottom line Sustainability for HRM, Business oriented Talent analytics and HR Sustainability, Role of Leadership in sustainable HRM practices.

Strategy and Planning David Hussey, 1999-08-10. One of a manager's most critical tasks is to develop strategy and although thinking on strategy is constantly shifting the underlying issues remain the same. Strategic planning is a task that exists in organisations of all sizes and at various levels of responsibility. This exceptionally useful and concise book provides essential information for managers and practitioners of strategic management particularly those requiring a bird's eye view of the whole subject who have neither the time nor inclination to read the encyclopaedic tomes that are currently available. The style is practical without sacrificing integrity and references are made to important sources in the literature. The book provides a framework for thinking about strategy which can be used as the basis for a written plan should this be needed. However it is not assumed that the end product of strategic thinking is always a written plan although this is often the case. Whether the plan is written or memorised the steps and methods outlined in this book will help managers to develop a sound strategy. After taking the reader through a number of issues and steps in the development of corporate strategy the book explores strategic thinking in the context of marketing, manufacturing, finance and human resources. The final chapter is optional for those who are interested in an ongoing process of strategic planning.
