

CASE STUDIES & CRITICAL PERSPECTIVES

Yijin Wang

Business Elites and Urban Development Scott Cummings, 1988-01-01 Written in a non technical narrative style this book is an invaluable resource for anyone concerned with current trends in urban development During the Reagan era responsibility for urban planning and development was transferred from government to private business This private sector hegemony over urban development differs markedly from the liberal policy initiatives of the 1960s and 1970s Through a series of case studies this book examines these shifting trends and shows that private sector efforts to revitalize America s central cities have not been uniformly successful The contributors who are among America's leading social scientists utilize neo Marxist urban theory to explain the conditions under which private initiative enhances or erodes downtown Studying the Power Elite G. William Domhoff, Eleven Other Authors, 2017-08-04 This book critiques and redevelopment extends the analysis of power in the classic Who Rules America on the fiftieth anniversary of its original publication in 1967 and through its subsequent editions The chapters written especially for this book by twelve sociologists and political scientists provide fresh insights and new findings on many contemporary topics among them the concerted attempt to privatize public schools foreign policy and the growing role of the military industrial component of the power elite the successes and failures of union challenges to the power elite the ongoing and increasingly global battles of a major sector of agribusiness and the surprising details of how those who hold to the egalitarian values of social democracy were able to tip the scales in a bitter conflict within the power elite itself on a crucial banking reform in the aftermath of the Great Recession These social scientists thereby point the way forward in the study of power not just in the United States but globally A brief introductory chapter situates Who Rules America within the context of the most visible theories of power over the past fifty years pluralism Marxism Millsian elite theory and historical institutionalism Then a chapter by G William Domhoff the author of Who Rules America takes us behind the scenes on how the original version was researched and written tracing the evolution of the book in terms of new concepts and research discoveries by Domhoff himself as well as many other power structure researchers through the 2014 seventh edition Readers will find differences of opinion and analysis from chapter to chapter The authors were encouraged to express their views independently and frankly They do so in an admirable and useful fashion that will stimulate everyone s thinking on these difficult and complex issues setting the agenda for future studies of power Defending Community Randy Stoecker, 2010 A counter culture urban community takes control of its redevelopment The State, Elites and Urban Development Manuel Chávez Márquez,1993 **American Studies** Tack Salzman, 1990-05-25 This volume supplements the acclaimed three volume set published in 1986 and consists of an annotated listing of American Studies monographs published between 1984 and 1988 There are more than 6 000 descriptive entries in a wide range of categories anthropology and folklore art and architecture history literature music political science popular culture psychology religion science and technology and sociology **Chinese Urban Planning and Construction** Lanchun

Bian, Yan Tang, Zhenjiang Shen, 2021-05-29 This volume introduces and discusses the achievements and mechanisms of urban planning and construction in China from multiple professional perspectives covering practices and processes ranging from ancient times to the present day The book has 14 chapters each addressing a specific Chinese urban planning and construction topic with examples and applications in various cities and regions and each providing an all around analysis of Chinese urban development issues at different scales including government administrations planning progresses urban investments social impacts and construction models The book provides a comprehensive overview of urban planning and construction in China especially its successful experiences in the historical period and modern era which will greatly benefit scholars and readers who are interested in China as well as urban planners architects and historians The book is organized into 4 main parts Part 1 focuses on historical wisdom to summarize ancient Chinese efforts to cope with nature and the environment It interprets the unique wisdom of ancient Chinese cities related to regional design water conservancy system and urban districts Part 2 presents the transformation of urban planning in China by learning from both the traditional value and western experiences based on several cases such as the spatial development of Beijing and the Beijing Tianjin Hebei capital region the preservation of Qingdao city the urban community development and regeneration in Chongging city Part 3 explores the green and eco city by looking towards the future illustrating Chinese practices and efforts to build more sustainable cities such as green and low carbon city construction in Wuhan healthy city planning and eco cities construction in China Part 4 prospects the modern miracles brought forth by technological innovation and economic growth and introduces the newest planning trends in China such as the E commerce Taobao villages in China and the innovation districts in Beijing It also explains the driving force of the growth machine of Suzhou city American Society Daniel W. Rossides, 1993 This text invites students to pursue a career in sociology entices others to consider advanced courses and yet serves those who will take but one sociology course This basic textbook for Introduction to Sociology can also serve well in courses in American Society **Renew Orleans?** Aaron Schneider, 2018-03-27 Urban development after disaster the fading of black political clout and the onset of gentrification Like no other American city New Orleans since Hurricane Katrina offers powerful insight into issues of political economy in urban development and in particular how a city s character changes after a disaster that spurs economic and political transition In New Orleans the hurricane upset an existing stalemate among rival factions of economic and political elites and its aftermath facilitated the rise of a globally oriented faction of local capital In Renew Orleans Aaron Schneider shows how some city leaders were able to access fragmented local institutions and capture areas of public policy vital to their development agenda Through interviews and surveys with workers and advocates in construction restaurants shipyards and hotel and casino cleaning Schneider contrasts sectors prioritized during post Katrina recovery with neglected sectors. The result is a fine grained view of the way labor markets are structured to the advantage of elites emphasizing how dual development produces wealth for the few while distributing poverty and exclusion to the many

on the basis of race gender and ethnicity Schneider shows the way exploitation operates both in the workplace and the community tracing working class resistance that joins struggles for dignity at home and work In the process working classes and popular sectors put forth their own alternative forms of development The Leftmost City Richard Gendron, 2018-04-17 Almost all US cities are controlled by real estate and development interests but Santa Cruz California is a deviant case An unusual coalition of socialist feminists environmentalists social welfare liberals and neighborhood activists has stopped every growth project proposed by landowners and developers since 1969 and controlled the city council since 1981 Even after a 1989 earthquake forced the city to rebuild its entire downtown the progressive elected officials prevailed over developers and landowners Drawing on hundreds of primary documents as well as original previously unpublished interviews The Leftmost City utilizes an extended case study of Santa Cruz to critique three major theories of urban power Marxism public choice theory and regime theory Santa Cruz is presented within the context of other progressive attempts to shape city government and the authors findings support growth coalition theory which stresses the conflict between real estate interests and neighborhoods as the fundamental axis of urban politics. The authors conclude their analysis by applying insights gleaned from Santa Cruz to progressive movements nationwide offering a template for progressive coalitions to effectively organize to achieve political power Historical Journal of Massachusetts ,1993 International **Perspectives in Urban Studies** ,1993 DICTIONARY CATALOG of OFFICIAL PUBLICATIONS of the STATE OF NEW Communication, Media, and American Society Daniel W. Rossides, 2003 What is the role of communication YORK, 1988 technology and media in making American society more adaptive equitable and democratic Analyzing the field of communication against an in depth picture of American society this provocative wide ranging text explores how communication enterprises are intrinsically linked to the establishment and maintenance of social power Throughout the book changes in communication capabilities are related to changes in wealth and income distribution the structures of economic organizations work and the professions minorities law and government urbanization popular culture and globalization In an engaging narrative the author presents empirical evidence that suggests that popular beliefs about the democratic role of media and communications often are misguided While we are in an information age it is not an information revolution that can liberate society Emphasizing new technologies and media in contemporary American society Rossides shows how most forms of social communication throughout history language gestures clothing buildings and spaces Policy Studies Review ,1998 Some vols include special issues ships and railroads have sustained social power Intergovernmental Relations and Uneven Development in the Detroit and Nagoya Auto Regions Andrew James
