Thierauf,1992-05-20 A common complaint heard in today s business office is There is paper everywhere but I cannot find the document that I m looking for It is estimated that 90 percent of all data and information currently being processed and distributed within offices and between organizations

resides on paper Finding the physical space to store this paper can be a key problem To overcome this problem and others there is a need for a dramatic new approach to information processing found in business Such an approach is found in this unique and useful volume Essentially image processing systems in business use today s computer technology to solve paper processing and storage problems Their main means of processing is performed electronically that is documents are captured initially on an electronic medium and forwarded to other users in the same mode In this manner their essential means of communicating with users is in an electronic format versus a paper one Also image processing systems in business are much more flexible in meeting changing user needs especially when the data is stored on optical disk **Topical Conference on**

Management of Information Technology Carroll W. Frenzel,1999 This text looks at the management and enterprise wide issues of information technology from strategic planning and technology assessment to operational activities and controls from a managerial perspective Information Engineering Robert Mylls,1994-01-11 By revolutionizing the way in which information is collected processed stored and distributed information engineering IE and computer aided software engineering CASE are helping to fuel the race to make businesses more competitive efficient and productive Entire organizations have been radically restructured thanks to the fact that IE and CASE now make information directly accessible throughout an organization without being distilled through multiple layers of management But good intentions and dollars spent are no guarantee of success and any technology old or new is only as good as the managers who manage it and the staff who uses it Information systems rarely fail because of technical inadequacies Usually the failure stems from a lack of staff expertise in how to apply the basic concepts and principles of new technologies to the unique organizational milieu Information Engineering was designed to assist managers and information workers in high tech companies to successfully integrate and maintain computer aided software programs into their organization s engineering information system It provides step by step guidance to the assessment of a company s specific needs and to the implementation of systems tailored to the company s business goals And it describes how commercially available CASE packages can be successfully combined with engineering systems developed in house By following the proven training techniques found in this book managers will quickly develop staffs fully versed in planning designing analyzing and constructing integrated information systems that support complex manufacturing and supply operations or any high tech business that reliesheavily upon the rapid information exchange of complex technical information *Data Processing Digest* ,1992
