*Morality, Competition, and the Firm* Joseph Heath, 2014 The essays by Joseph Heath collected in this volume collectively present a program in business ethics that he calls the market failures approach They develop a theoretical framework that lies between two opposing positions in business ethics on one hand the stakeholder theory which identifies moral obligations within an organization by identifying its key groups and the self explanatory shareholder primacy theory Heath's market failures approach lies between these approaches and argues that firms should be guided by the ideal of a perfectly competitive market and that ethical behavior in this context consists primarily in refraining from taking advantage of imperfections in existing markets Heath's approach puts particular emphasis on the market as a competitively structured interaction with different duties owed to individuals inside and outside the firm and explains why business managers cannot have fiduciary responsibilities toward every stakeholder group His theory draws on recent work in adversarial ethics welfare economics agency theory and the theory of the firm in order to provide an account of business ethics that can be integrated with recent thinking about corporate law and the normative basis of state regulation of the economy
