Businessmen And Politics:

Businessmen and Politics A. D. D. Gordon, 1978 During the Non Cooperation and Civil Disobedience movement of the 1920s and 1930s Bombay came to be known as the keep of Gandhism Its businessmen were seen as the front line troops and backroom financiers of the nationalists But it was principally among merchants and traders that this commitment to Gandhian nationalism was deepest the great industrialists tended to stand aloof and sometimes even actively opposed the nationalists Yet in terms of the boycott of foreign trade it was they who apparently had most to gain from the economic doctrines of the Indian National Congress In quiet times indeed the industrialists were capable of switching allegiance and supporting the Congress in its attempt to win independence by constitutional means Dr Gordon sets out to explain this seeming paradox between the economic interests of the industrialists and their political activity He examines politics in relation on the one hand to the forced modernization of the market sector of the economy and on the other to the profound financial and economic changes following the First World War Using a wide range of sources many of them hitherto unexplored Dr Gordon argues that the politics of businessmen in a developing colonial economy can only be understood when related to the tensions inherent in the process of economic modernization This book will interest not only historians of modern India but also the students of colonial economies throughout the world

Notwithstanding the myriad forms of government assistance to American business the relationship of business to politics in the United States remains a highly antagonistic one characterized by substantial mutual distrust This adversarial relationship is both reflected and reinforced not only in American business ideology but also in America s unique legalistic and confrontational style of regulation the political strategies of the public interest movement the American approach to American industrial policy and the distinctive way Americans think about the subject of business ethics This volume brings together more than two decades of scholarship on business and politics by one of the leading authorities on this subject These essays also explore a number of critical contemporary issues including the ongoing debate over the scope and extent of business power in America the growth of shareholder protests and consumer boycotts the changing politics of consumer and environmental regulation and the emergence of both public and business interest in business ethics In addition they place the contemporary dynamics of American business government relations in both an historical and comparative context Finally these essays demonstrate the importance of integrating the study of business by political scientists with the study of politics by students of management Originally published in 1996 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905
