The Geek Gap Bill Pfleging, 2009-12-02 The Geek Gap is thoroughly original virtually unique of paramount importance and on top of ALL that a great read Bill Pfleging and Minda Zetlin deserve a giant Hats off for this wonderful piece of work Tom Peters Business managers suits and technology professionals geeks have become warring camps in too many companies

While both groups have no trouble following the lingo of their own specialties when they have to communicate with each other neither side fully understands or wants to understand the other And that s a big problem in an increasingly technology dependent business environment where success depends on the smooth integration of both business savvy and technological expertise Bill Pfleging a respected computer and Web consultant and Minda Zetlin a veteran business writer explore in this insightful witty and very instructive book the culture clash that pervades nearly every business technology interaction The Geek Gap provides members of both camps a practical guide to working together effectively Using many real world examples the authors vividly illustrate the consequences in time money careers and even lives when these separate cultures fail to communicate By far the most serious example was the Challenger space shuttle disaster which was likely the direct result of an internal clash and lack of communication between NASA s managers and engineers The authors provide practical solutions for building trust between business and computer professionals The book is filled with tips aimed at geeks and suits to help each group understand the other communicate in what amounts to a foreign language and get what they need to do their jobs effectively The authors profile companies and individual executives who have successfully bridged the gap by conducting events that bring the two groups together switching jobs from one area to the other creating whole new careers as go betweens and much much more This is the first book to directly address issues of communication and understanding between business and technology people The Geek Gap in identifying this problem and providing numerous practical and workable solutions is an indispensable guide for all Bill Pfleging Woodstock NY is a computer and Web consultant who writes a regular technology column for the Woodstock Times With computer experience going back to the early 1970s at IBM he has also worked for Tripod com and Lycos Network Minda Zetlin Woodstock NY is a longtime business writer whose work has appeared in Crain s New York Business Success Management Review and other publications She is also the author of Telecommuting for Dummies and co author of The ASJA Guide to Freelance Writing
