Handbook of Research on Remote Work and Worker Well-Being in the Post-COVID-19 Era Wheatley, Daniel, Hardill, Irene, Buglass, Sarah, 2021-04-16 With the introduction of policies to combat COVID 19, far greater numbers of employees across the globe, including those with limited job autonomy, have moved to undertake their entire job at home. Although challenging in the current climate, embracing these flexible modes of work, such as working at home, including relevant investment in technology to enable this, will not only deliver potential organizational benefits but also increase the adaptability of the labor market in the short and longer terms. Although perhaps not the central concern of many in the current climate, good home based work is achievable and perhaps even a solution to the current work based dilemma created by COVID 19 and should be a common goal for individuals, organizations and society. Research also has shifted to focus on the routines of workers, organizational performance and well being of companies and their employees along with reflections on the ways in which these developments may influence and alter the nature of paid work into the post COVID 19 era. The *Handbook of Research on Remote Work and Worker Well Being in the Post COVID 19 Era* focuses on the rapid expansion of remote working in response to the global COVID 19 pandemic and the impacts it has had on both employees and businesses. The content of the book progresses understanding and raises awareness of the benefits and challenges faced by large scale movements to remote working, considering the wide array of different ways in which the large scale movement to remote
