The Creator Economy Ahmed Musa, 2024-12-24 The rise of the creator economy has opened doors for individuals to monetize their passions like never before This book provides a comprehensive guide to building a personal brand growing an online audience and turning content creation into a profitable venture Learn about platforms strategies and tools that can help you succeed in this booming digital landscape

Toward a Philosophy of Organized Student Activities Herbert Hewitt Stroup, 1964 Toward a Philosophy of Organized Student Activities was first published in 1964 The increased scope and complexity of student personnel work in colleges and universities in recent years has emphasized the need for a more mature philosophy in the field This book outlines such a philosophy after tracing the growth of student activities in American institutions of higher education The author develops a number of themes to illustrate the present lack of coherent doctrine in organized student activities to analyze the problems involved and to make proposals for their solution He attacks some misconceptions of the proper function of student activities he does not believe for example that the development of the whole personality is a proper concern of the discipline nor on the other hand that its function is purely custodial He is concerned with defining the nature of the authority of the university in relation to the student and he shows that much of the difficulty in maintaining control of students stems from social and economic changes such as the decline of the hierarchical family loose notions of individualism and the view of education as a commodity He makes clear his conviction that student activities given the proper objectives and the means of realizing them can contribute greatly to the educational process Administrators and faculty members outside the field may gain insight into organized student activities through this book and it will of course be of particular interest to workers in the field This is volume 7 in the Minnesota Library on Student Personnel Work of which E G Williamson is editor

Critical Internet Literacies Jamie Cohen, 2024-12-30 An introductory critical internet studies text that builds upon media literacy and digital culture theory to offer a thorough examination of the intersection of online technology and culture We are now collectively at a hinge point in the evolution of the web where online influencers can sway national discourse geopolitical events are remixed through memes and online harms are misunderstood This book argues that people are generally aware that online media has repercussions in off platform spaces but sometimes lack the language to properly critique online trends memes and internet born media How are citizens activists and marginalized groups able to use these tools effectively and safely in these times Jamie Cohen explores aspects of internet culture in an approachable manner building upon critical media literacy and applying a critical technocultural analysis as a methodology to reimagine how media literacy can operate in an online media environment The book explores key topics such as accessibility the creator economy content moderation tech bias platform capitalism internet culture and safety Offering a new way of reading internet media and critiquing content and creators this book is essential reading for students and scholars of digital culture internet culture media literacy social media and beyond

Business 4.0 as a Subject of the

Digital Economy Elena G. Popkova, 2022-06-14 This book substantiates the transformation processes in the system of modern entrepreneurship in the conditions of formation of Industry 4.0. The authors develop a scientific concept of business 4.0, determine the specific features of business 4.0 and current problems and perspectives of its development in developed and developing markets, study the infrastructural provision of business 4.0 in view of its sectorial specifics, outline the perspectives and recommendations in the sphere of development of business 4.0 and offer the scientific and practical recommendations for state and corporate management.

Data-Driven Innovation in the Creative Industries Melissa Terras, Vikki Jones, Nicola Osborne, Chris Speed, 2024-04-17 The creative industries, the place where art, business and technology meet in economic activity, have been hugely affected by the relatively recent digitalisation and often monetisation of work-home relationships and leisure. Such trends were accelerated by the global COVID-19 pandemic. This edited collection examines how the creative industries can be supported to make best use of opportunities in digital technology and data-driven innovation. Since digital markets and platforms are now essential for revenue generation and audience engagement, there is a vital need for improved data and digital skills in the creative and cultural sectors. Taking a necessarily global perspective, this book explores the challenges and opportunities of data-driven approaches to creativity in different contexts across the arts, cultural and heritage sectors. Chapters reach beyond the platforms and approaches provided by the technology sector to delve into the collaborative work that supports innovation around the interdisciplinary and cross-sectoral issues that emerge where data infrastructures and approaches meet creativity. A novel intervention that uniquely centres the role of data in the theory and practice of creative industries innovation, this book is valuable reading for those researching and studying the creative economy as well as for those who drive investment for the creative industries in a digitalised society.
