Big Book of Virtual Teambuilding Games: Quick, Effective Activities to Build Communication, Trust and Collaboration from Anywhere! Mary Scannell, Michael Abrams, Mike Mulvihill, 2011-12-16 Get remote team members to interact as if they're in the same room Whether you're videoconferencing with team members across the world or emailing a colleague sitting ten feet away the truth is evident technology has permanently altered the way we communicate The virtual workplace can facilitate quicker decision making and reduced overhead But the lack of face to face interaction can also impede trust innovation and creativity among team members The Big Book of Virtual Team Building Games is packed with games and activities for developing productive virtual teams across all digital platforms including email mobile devices web based conferencing tools and social media sites such as Facebook Twitter and Skype The Big Book of Virtual Team Building Games helps you Build a greater sense of community and reduce conflict Increase levels of engagement Get the most out of more introverted team members Boost team members productivity Make sure that the only thing separating your people is distance The Big Book of Virtual Team Building Games is just the tool you need to develop trusting relationships foster clear communication and use technology to enhance the team's connections

Working Virtually: Challenges of Virtual Teams Jones, Robert, Oyung, Rob, Shade Pace, Lise, 2005-04-30 Virtual teams have been used to leverage scarce and distributed resources for many years Expense reductions health epidemics air travel safety and complex supply chains have only intensified this need General best practices for leading and participating in virtual teams are well known but why are there still misconceptions about their effectiveness What drives the notion that face to face is always better How can groups and individuals take the most advantage of virtual teams through the appropriate use of technology Working Virtually Challenges of Virtual Teams provides an in depth practical perspective on the growing dependence of virtual teams and how to best exploit them Based on years of direct experience in managing and participating in virtual teams as well as developing solutions to help virtual teams be more effective the authors have provided unique insight that can be leveraged to help you get the most of your virtual teams

Success Factors of Virtual Teams in the Conflict of Cross-Cultural Team Structures Stephan Sembdner, 2011-06 Due to strong competition and to the most recent market requirements more and more enterprises or organisations have to realign their business activities in a new way to cope with the current economic situation In the respective organisational structures specific changes have to be made to manufacture the products and to provide relevant services more effectively Moreover services are often provided increasingly no longer from a centralised location For this reason decentralised teams in various locations have developed working together to jointly reach the targets So overall organisations are facing new challenges to a growing extent On the one hand they have to cope with customers from different cultural areas and on the other hand the structure of the employees is changing simultaneously The organisations have international departments or not The trend is now clearly towards heterogeneous team structures

Consequently it is crucial for the organisations to be successful in spite of generally tougher market conditions And this operational success will not come about automatically but will require well functioning efficient teams Before starting with the proper analysis of the success factors for team building first of all the theoretical basis will be provided A general overview will be given on the central subject matter and simultaneously basic concepts will be initially presented The second chapter deals with the topic of team and team work Starting with the central topic s partial aspect virtual team the term team will be defined and examined more in detail In this context first a historical review and the development of the terms will be provided And hereby a distinct differentiation is made between the individual terms Additionally the transition from the customary team to the virtual team and its particular characteristics will also be emphasised A further relevant aspect of the central subject matter is in particular the term cross cultural It refers above of all to the general topic of culture and this will be in the focus of the third chapter The goal here is to describe the fundamentals of culture and the factors on which culture is built on Another emphasis is on the models explained in the specialised literature These explanations are necessary for analysing the two terms of intercultural competence and intercultural communication more precisely The fourth chapter deals with the central topic of success factors They are to be described and analysed here which contribute significantly to the success of a virtual team For this purpose for each success factor a definition is to be provided and the respective significance will be emphasised The intercultural context is also a major focus In the specialised literature a wide range of factors have been described The selection of such factors which are to be considered result from the findings of research work in the area of specialised literature and are at the same time closely linked to the author s previous job experiences Consequently the work in relation to this book and the findings are of particular importance for the author Chapter five is to meet the requirements regarding the evaluation of the theoretical findings based on practical experience As the factors to be analysed have not yet been finally determined a quantitative analysis cannot be made here This would require a more comprehensive analysis or survey with a corresponding time frame with the aim to get complex data material and figures serving as a basis for empirical analysis and evaluation The basis for the analysis will be the practice oriented experiences of experts which have been gained through interviews The questions necessary for achieving this goal result from the factors that have been elaborated in chapter four At the end of chapter five general statements from experts will be the basis for the final evaluation In chapter six major results from the previous chapters will be given Furthermore the findings of chapter four will be contrasted with the general statements obtained from the interviews listed in chapter five Based on the hereof resulting final consequences recommendations for further focal areas of research and analyses will also be given
