web jun 30 2021 once the load balancer receives a request it determines which server in a pool is available and then routes

the request to that server by routing the requests to available servers or servers with lower workloads load balancing takes the pressure off stressed servers and ensures high availability and reliability

**what is load balancing what load balancing solutions are** - Jul 05 2023

web load balancing is a core networking solution used to distribute traffic across multiple servers in a server farm load balancers improve application availability and responsiveness and prevent server overload

**what is load balancing serverwatch** - Jan 31 2023

web nov 25 2020 load balancing is a technique that ensures an organization s server does not get overloaded with traffic with load balancing measures in place workloads and traffic requests are distributed across server resources to provide higher resilience and availability

what is server and application load balancing types - Jun 23 2022

web jan 6 2020 there are a number of specific types of load balancing you might need to consider for your network including sql server load balancing for your relational database global server load balancing for troubleshooting across multiple geographic locations and dns server load balancing to ensure domain name functionality

**what is load balancing how load balancers work cloudflare** - Sep 07 2023

web load balancing is the practice of distributing computational workloads between two or more computers on the internet load balancing is often employed to divide network traffic among several servers this reduces the strain on each server and makes the servers more efficient speeding up performance and reducing latency

**what is server load balancing definition related faqs avi** - Feb 17 2022

web server load balancing slb is a technology that distributes high traffic sites among several servers using a network based hardware or software defined appliance and when load balancing across multiple geo locations the intelligent distribution of traffic is referred to as global server load balancing gslb
