**Engineering Future Crops Through Genome Editing** Aytug Tuncel, Hyun Uk Kim, Min Chul Kim, 2025-11-24 Crop breeding a practice dating back to the origins of agriculture involves modifying plants to suit human needs Traditional breeding has limitations including time consuming processes and labor intensive efforts Transgenic methods suffer from a negative public opinion and face substantial regulatory hurdles In contrast genome editing is a more effective and versatile approach for trait enhancement which receives broader acceptance among the public Particularly the recently developed CRISPR Cas based tools allow various programmable modifications in plant genomes These include creating gene knock outs by inducing double stranded breaks introducing beneficial mutations through more precise base and prime editing or altering gene activity through transcriptional activation repression and epigenome editing In light of the recent loosening of regulatory policies by governmental bodies particularly in the US and EU genome editing has the potential to revolutionize agriculture by enhancing crop yields and nutritional quality The projected rise in global population requires concurrent increases in agricultural output to ensure worldwide food security Likewise the rise of diet related non communicable diseases necessitates the consumption of more nutritious crops to help mitigate the prevalence of hidden hunger obesity and autoimmune disorders The sustainable approach is to improve the yield and nutritional value of the most widely consumed crops e g rice maize wheat potato soybean and not expand the amount of land allocated to agriculture as this puts stress on the environment Crop yield can be improved by targeting traits related to photosynthesis nutrient uptake and utilization

plant architecture storage organ number size weight biotic and abiotic stress tolerance and postharvest storage Similarly the nutritional quality of crops can be enhanced through macronutrient e g carbohydrate protein oil or micronutrient e g vitamins antioxidants minerals engineering as well as by reducing antinutrient content Despite the recent advancements there is a growing need for further research in crop trait modification Genome editing can help engineer these traits faster and easier than ever heralding a new era of precision agriculture We invite contributions to our Research Topic which will explore innovative advancements in genome editing techniques applied to crop plants Specifically we encourage manuscripts addressing the following themes Yield enhancement through genome editing Strategies to boost plant productivity and efficiency Developing stress resistant crops with enhanced tolerance to biotic and abiotic challenges Biofortification and the reduction of antinutrients using precise genome editing Innovations in genome editing for the production of beneficial secondary metabolites Novel genome editing tools and their application in transgene free crop breeding Submissions related to the development of novel genome editing tools that demonstrate the potential of trait improvement as well as proof of concept studies that demonstrate transgene free gene editing are also encouraged We welcome Original Research Review and Perspective articles that contribute to the field of sustainable crop improvement using genome editing techniques **PC Mag** ,1984-05-29 PCMag com is a leading authority on technology delivering Labs based independent reviews of the latest products and services Our expert industry analysis and practical solutions help you make better buying decisions and get more from technology American Bee Journal ,1907 Includes summarized reports of many bee keeper associations **"A"** **New English Dictionary on Historical Principles** James Augustus Henry Murray,1928 **Stenographer and Phonographic World** ,1892 **Books in Print Supplement** ,2002 **The Engineer** ,1961 **The Journal of Nutrition** ,1967 Vols 7 42 include the Proceedings of the annual meeting of the American Institute of Nutrition 1st 9th 11th 14th 1934 1942 1947 1950 1st 8th 1934 1941 issued as supplements to the journal Choice ,1989 Forthcoming Books Rose Arny,1994-02 **Microwave Journal** ,1992
