Transfer of Knowledge through Art and Visualization Anna Ursyn, 2023-12-06 This book offers strategies for the transfer of knowledge through combining information technology and visual arts and examining how to visually enhance and convey knowledge. Specifically, it presents a fresh look at how technology-based science-inspired projects can be innovatively delivered through artistic methods. It explores a selection of inventions gained through the collaboration of internationalist professionals in various fields of knowledge before outlining a new approach in how knowledge can be delivered using the inventions in a novel visual way through action-based visual storytelling, video, graphical display, and visualization. Crucially, it looks at how current media and techniques used for presenting topics in industries, corporations, commerce, and marketing companies could be successfully translated and developed as a presentation skill in the school, college, or university environment. It thus seeks to address the skills that prospective employers expect from students in terms of possessing the ability to create visual presentations of data, solutions, and products. With a sharp focus on the current generation, schools, academies, business, and marketing companies, and catering to the modern demand for novelty in presentation, it makes a strong contribution to the conversation around professional collaboration, visual communication, knowledge transfer, novel technologies, and knowledge visualization.

Applied AI Solutions for the Industry - Part 1 Dr Partha Majumdar, 2025-11-16 Artificial Intelligence has moved beyond theory; it's now delivering measurable impact in real business environments. This first volume in the Applied AI Solutions for Industry series presents three in-depth case studies, each documenting how a customer's unique requirements were transformed into a working AI-powered solution that delivered tangible value. Drawing directly from live industry projects, the book offers a rare behind-the-scenes look at how AI is applied to solve practical, domain-specific challenges.

Chapter 1: Transforming Operations in the Telecom Sector. The first chapter addresses the needs of a Communications Service Provider (CSP) striving to improve efficiency and customer experience in a highly competitive market. The solution integrates AI-driven analytics, predictive modelling, and process automation to optimise network operations and proactively resolve service issues before they impact customers. The chapter explains the problem context, walks through the solution design, and highlights the measurable benefits achieved, making it a valuable blueprint for other telecom players.

Chapter 2: AI-Enhanced Decision Making in the Apparel Industry. The second chapter focuses on the apparel sector where fashion cycles are short, market demand is volatile, and operational efficiency is critical. Faced with a customer requirement to streamline production planning and inventory management, the solution harnessed AI to forecast demand, reduce waste, and optimise supply chain operations. Readers gain insights into how historical sales patterns, seasonal trends, and emerging fashion data were incorporated into a predictive framework that enabled faster and more accurate decision-making.

Chapter 3: Boosting Productivity in the Fertiliser Industry. The final chapter explores the fertiliser industry, a sector critical to global agriculture and food security. Here, the customer sought a way to improve productivity while reducing operational bottlenecks. The solution employed AI to analyse production data, identify inefficiencies, and provide actionable

recommendations for process improvement This chapter details how domain expertise was integrated with AI modelling demonstrating the power of combining human insight with machine intelligence to deliver sustainable gains Throughout the book each solution is presented as a complete journey from the customer's initial requirement through to the final implementation and the benefits realised The emphasis is on clarity replicability and the practical aspects of AI adoption making the content equally relevant for industry professionals technology practitioners and business leaders This volume is the first in a continuing series As we work with more customers and address new challenges future instalments will document and share additional AI solutions across other industries The guiding principle will remain the same to deliver tailored effective and measurable AI implementations grounded in real business needs Whether you're exploring AI for your organisation seeking inspiration for solving industry specific problems or simply interested in understanding how AI is applied in practice *Applied AI Solutions for Industry Part 1* offers valuable insights and actionable frameworks drawn from real world success stories
