Leading Effective Virtual Teams Nancy M. Settle-Murphy, 2012-12-13 A proliferation of new technologies has lulled many into thinking that we actually have to think less about how we communicate. Written as a series of bulleted tips drawn from client experiences and best practices, *Leading Effective Virtual Teams* is a practical guide to building effective virtual teams. **The Future of Think Tanks and Policy Advice in the United States** James McGann, 2021-01-15 At a moment when both think tanks and experts are being questioned, significant policy and technology disruptions have called into question the value and efficacy of policy advice. Within that context, Dr. McGann launched this book to examine the future of think tanks and policy advice around the world with a series of authoritative reflections written by the presidents of some of the leading think tanks in the United States. The book explores the challenges think tanks face today in an information-rich and highly competitive operating environment that includes the impact of technology, big data, and artificial intelligence; competition from advocacy groups and public relations firms; increased polarization of politics; and major changes in how think tanks are funded. **Teambuilding That Gets Results** Linda Eve Diamond, Harriet Diamond, 2007 Teambuilding is one of the fastest growing areas on the business shelf as companies look to increase efficiency and morale. *Teambuilding That Gets Results* is an easy-to-use guidebook for building effective teams that will increase the strength of any business. Topics include: Building strong, flexible, collaborative teams; Team assessment; Team culture; Stages of team development; Teams that succeed; Ice breaker activities; And more. It has the potential to offer solutions for a number of health and resource-based problems the world is facing, such as unmet medical needs and fossil fuel dependency. Considerable effort and investment has been expended in recent years to try and improve the outcomes of technology transfer in order to fulfill this potential. This book presents seventeen best practice case studies on the topic of effective technology transfer in biotechnology. The selected case studies focus on technology transfer offices, funding models, incubators, education, and clusters. Each presents an overview of an initiative that was deployed in Europe with the aim of supporting and stimulating the transfer of biotechnology discoveries and technologies from research laboratories to society. Readers are provided with a critical assessment of each initiative, and policy makers, entrepreneurs, cluster managers, and research institute managers will find inspiring lessons they can draw on when developing and implementing similar initiatives elsewhere. These cases are the product of research undertaken as part of the ETTBio Effective Technology Transfer in Biotechnology project, co-financed by

the European Union ERDF European Regional Development Fund and made possible by the INTERREG IVC Programme ETTBio commenced in January 2012 and concluded in December 2014
