subject Business economics Company formation Business Plans grade A Vienna University of Economics and Business language English abstract The purpose of this paper is three fold First it is intended to establish a new framework by combining literature streams on start up success with research on cultural and institutional environments Although a wide array of literature on start ups cultural and institutional literature exists connecting research is underdeveloped This paper hence sets out to bridge these differing streams of literature 1 In fact one has to bear in mind that although always termed a worldwide crisis many developing countries and BRIC states have not been affected Second drawing upon the impact of globalization and the Internet new implications for the sourcing of business ideas will be generated A lot of attention has been paid to the development of start ups and the characteristics of entrepreneurs However the step in the development chain where the idea is generated has received comparably low attention This paper thus tries to explore some sources and

mechanisms evolved through globalization and use of the Internet Third a case study designed to explore the above mentioned new framework and implications is expected to support the development of a new model It is therefore the overall purpose of this paper to produce a theoretically grounded and practically applicable model A model that should cover the most important aspects when copying and implementing a business concept from a different country Business Week,2008
