Quah,2011-01-10 This volume presents the highlights of current global thinking about sexual and reproductive health Major
changes have taken place in the last 15 years in the way decision makers think about the subject and the manner in which
programmes deliver comprehensive sexual and reproductive health services The turning point was the International
Conference on Population and Development ICPD held in Cairo Egypt in 1994 ICPD was a watershed for several reasons First
more than in any of the preceding United Nations population conferences the issue of population was clearly placed as being
central to sustainable development Second the narrow focus on population growth the population bomb which had been a
neo Malthusian concern and preoccupation ever since the Club of Rome published its 1972 report Limits to Growth was
replaced by the comprehensive concept of sexual and reproductive health Third and linked to the definition and introduction
of the reproductive health concept was the strong call for a paradigm shift away from a policy environment driven by
demographic considerations sometimes to the point of using coercion in family planning services in order to reach
demographic targets to an environment that recognized the right of individuals to make their own choices And last but not
least ICPD as well as the Fourth World Conference on Women FWCW held the following year in Beijing People s Republic of
China strongly emphasized that the rights of women and men to good sexual and reproductive health are firmly grounded in
universal human rights Provided by publisher Catalog. Supplement - Food and Nutrition Information and Educational
